Latin America Leslie A. Schwindt-Bayer, 2018-01-04 In the past thirty years women's representation and gender equality has developed unevenly in Latin America. Some countries have experienced large increases in gender equality in political offices whereas others have not and even within countries some political arenas have become more gender equal whereas others continue to exude intense gender inequality. These patterns are inconsistent with explanations of social and cultural improvements in gender equality leading to improved gender equality in political office. Gender and Representation in Latin America argues instead that gender inequality in political representation in Latin America is rooted in institutions and the democratic challenges and political crises facing Latin American countries and that these challenges matter for the number of women and men elected to office, what they do once there, how much power they gain access to and how their presence and actions influence democracy and society more broadly. The book draws upon the expertise of top scholars of women, gender and political institutions in Latin America to analyze the institutional and contextual causes and consequences of women's representation in Latin America. It does this in part 1 with chapters that analyze gender and political representation regionwide in each of five different arenas of representation: the presidency, cabinets, national legislatures, political parties and subnational governments. In part 2 it provides chapters that analyze gender and representation in each of seven different countries: Argentina, Chile, Costa Rica, Uruguay, Mexico, Brazil and Colombia. The authors bring novel insights and impressive new data to their analyses, helping to make this one of the most comprehensive books on gender and political representation in Latin America today.

Decolonizing Applied Linguistics Research in Latin America, Harold Castañeda-Peña, Paola Gamboa, Claire Kramsch, 2023-09-29. This collection explores the critical decolonial practices of applied linguistics researchers from Latin America and the Latin American diaspora, shedding light on the processes of epistemological decolonization and moving from a monolingual to a multilingual stance. The volume brings together participants from an AILA 2021 symposium in which researchers reflected on applied linguistics in Latin America and on the ways in which it brought concerns around social justice, the legacy of coloniality and the role of monolingual English in education to the fore. Each chapter is composed of four parts: an autobiographical section written both in Spanish or Portuguese and in English, followed by a reflection on the epistemological differences between versions, a discussion in English of the research project, a critical reflection on the epistemic practices and critical pedagogies enacted in the project and the author's understanding of the concept of decolonization and recommendations for further decolonizing the monolingual mindset of language teachers and learners. At once linguistic, epistemological and political, the collection aims to diversify the concept of decoloniality itself and showcase other ways in which decolonial thought can be implemented in language education. This book will be of interest to scholars in

applied linguistics sociolinguistics and language education
