

## ENGANCHE DE UN REMOLQUE, UNA CARAVANA, ...

Para más información acerca de las masas y cargas remolcables, consulte el apartado 9, apartado "Masas".

### Consejos de conducción

El vehículo remolcado debe tener las ruedas libres: caja de velocidades en punto muerto.

### Distribución de la carga

Distribuya la carga en el remolque de modo que los objetos más pesados se encuentren lo más cerca posible del eje y que el peso en la lanza se aproxime al máximo autorizado sin sobrepasarlo.

### Refrigeración

Arrastrar un remolque en una pendiente aumenta la temperatura del líquido de refrigeración.

Dado que el ventilador se acciona eléctricamente, su capacidad de refrigeración no depende del régimen motor.

Por tanto, utilice una marcha larga de la caja de velocidades para reducir el régimen motor y así disminuir la velocidad.

En todo momento, esté atento a la temperatura del líquido de refrigeración.
