

Exponential Match-Up

Key

We have been looking at how exponential functions grow. Today we'll look at the graphs of these exponential functions and use what we know about transformations to match the graphs to their equations.

Exponential functions are either always increasing or always decreasing.

- Match graphs A-F with their equation. Then determine whether the graph is increasing or decreasing and its concavity. Record your results in the table.

Graph	Equation	Increasing or Decreasing?	Concave Up or Concave Down?
A	2^x	increasing	up
B	$(\frac{1}{2})^x$	decreasing	up
C	$(\frac{1}{2})^x$	decreasing	up
D	-2^x	decreasing	down
E	3^{-x}	decreasing	up
F	3^x	increasing	up

No inflection pts \leftrightarrow concavity does not change.

- How can you tell from an equation whether the function models exponential growth or decay?

If $b > 1$ then there is exponential growth
If $0 < b < 1$ there is exponential decay

- One extra equation card turned up that wasn't part of your original set! Which graph would this match with? How do you know?

$$y = 2^{-x}$$

This would match with graph C.
 2^{-x} is a reflection across the y-axis which now models exponential decay.

- Explain why it is possible that one graph could represent two different equations.

Some equations can be re-written in multiple ways using exponent properties.

- Match graphs G-L with their equation and graph behavior. Record your results in the table.

Graph	Equation	Increasing or Decreasing?	Concave Up or Concave Down?
G	2^{x-1}	increasing	up
H	$3^x + 2$	increasing	up
I	2^{x-1}	increasing	up
J	$2(\frac{1}{2})^x$	decreasing	up
K	$-3^x + 3$	decreasing	down
L	3^{x+1}	increasing	up

- Petra believes that graph L represents the parent function $y = 3^x$ after it has been shifted to the left one unit. Pierre believes that graph L represents the parent function $y = 3^x$ after it has been vertically stretched by a factor of 3. Who is correct? Give a convincing reason.

Both are correct! Stretching by 3 means we have $3 \cdot 3^x$ which gives one extra factor of 3 so we really have 3^{x+1} which is a horizontal shift left 1.

Romberg, 1999-04-01 Mathematics Classrooms That Promote Understanding synthesizes the implications of research done by the National Center for Research in Mathematical Sciences on integrating two somewhat diverse bodies of scholarly inquiry the study of teaching and the study of learning mathematics This research was organized around content domains and or continuing issues of education such as equity and assessment of learning and was guided by two common goals defining the mathematics content of the K 12 curriculum in light of the changing mathematical needs of citizens for the 21st century and identifying common components of classrooms that enable students to learn the redefined mathematics with understanding To accomplish these goals classrooms in which instruction facilitated the growth of understanding were established and or studied This volume reports and discusses the findings which grew out of this research and subsequent papers and discussions among the scholars engaged in the endeavor Section I Setting the Stage focuses on three major threads What mathematics should be taught how we should define and increase students understanding of that mathematics and how learning with understanding can be facilitated for all students Section II Classrooms That Promote Understanding includes vignettes from diverse classrooms that illustrate classroom discourse

student work and student engagement in the mathematics described in Chapter 1 as well as the mental activities described in Chapter 2 These chapters also illustrate how teachers deal with the equity concerns described in Chapter 3 Section III addresses Developing Classrooms That Promote Understanding The knowledge of the teaching learning process gained from the research reported in this volume is a necessary prerequisite for implementing the revisions called for in the current reform movement The classrooms described show that innovative reform in teaching and learning mathematics is possible Unlike many volumes reporting research this book is written at a level appropriate for master s degree students Very few references are included in the chapters themselves instead each chapter includes a short annotated list of articles for expanded reading which provides the scholarly basis and research substantiation for this volume
