Excerpt from *The Development of the Human Body* A Manual of Human Embryology

The increasing interest in human and mammalian embryology which has characterized the last few years has resulted in many additions to our knowledge of these branches of science and has necessitated not a few corrections of ideas formerly held. In this fourth edition of this book the attempt has been made to incorporate the results of all important recent contributions upon the topics discussed and at the same time to avoid any considerable increase in the bulk of the volume. Several chapters have therefore been almost entirely recast and the subject matter has been thoroughly revised throughout so that it is hoped that the book forms an accurate statement of our present knowledge of the development of the human body. To several colleagues the author is indebted for valuable suggestions and in this connection he desires especially to thank Dr J C Watt for much generous assistance in the revision of the manuscript and for undertaking the correction of the proof sheets. In addition to the works mentioned in the preface to the first edition as of special value to the student of Embryology mention should be made of the *Handbuch der vergleichenden und experimentellen Entwicklungslehre der Wirbeltiere* edited by Professor Oscar Hertwig and especially of the *Manual of Human Embryology* edited by Professors F Keibel and F P Mall.

Excerpt from *The Development of the Human Body* A Manual of Human Embryology

Somewhat more than seventy years ago 1839 one of the fundamental principles of biology was established by Schleiden and Schwann as the cell theory. According to this all organisms are composed of one or more structural units termed cells each of which in multicellular organisms maintains an individual existence and yet contributes with its fellows to the general existence of the individual. Viewed in the light of this theory the human body is a community an aggregate of many individual units each of which leads to a certain extent an independent existence and yet both contributes to and shares in the general welfare of the community.
