Good Practices in Planning and Management of Integrated Commercial Poultry Production in South Asia R. Prabakaran, 2003-01-01 This publication reviews all aspects of poultry production in South Asia including layer production for eggs and broilers for meat Information is given on feeding and nutrition housing and general husbandry as well as on flock health Regional specificity always exists but this type of production also shows the many similarities in other parts of the world with regard to potential and constraints

Goose Production Roger B. Buckland, Gérard Guy, 2002-01-01 This publication aims to provide guidance on sustainable goose production systems that are based on the natural physiological and behavioural advantages of the goose These advantages include the fact that they can consume and digest large amounts of high fibre and low quality feed they are easy to manage and their rapid growth renders them one of the most efficient sources for meat production In addition feathers down and fatty liver are valuable by products while their strong territorial instinct makes them very effective guards As selective feeders geese have been used for weed control in a wide range of crops All aspects of goose production are discussed in this book including feeding and nutrition housing general husbandry flock health and breeding Regional differences in production practices are also described

Pastoralism in the New Millennium Food and Agriculture Organization of the United Nations, 2001-01-01 Pastoralism refers to the type of farming system which uses extensive grazing on grasslands for livestock production This type of farming covers 25 per cent of the world's land area and supports 20 million households It makes substantial contributions to the economies of developing countries although agricultural encroachment conflict and drought continue to erode this way of life This publication considers key policy issues and trends involved in attempts to improve the livelihoods of pastoralist families and communities

Village Chicken Production Systems in Rural Africa Aichi J. Kitalyi, Food and Agriculture Organization of the United Nations, 1998-01-01 The poultry production systems of Africa are mainly based on the scavenging indigenous chickens found in virtually all villages and households in rural Africa These systems are characterized by low output per bird Nevertheless over 70 percent of the poultry products and 20 percent of animal protein intake in most African countries come from this sector Therefore increased rural poultry production would result in a positive impact on household food security both in increased dietary intake and in income generation This study coincided with the World Food Summit held at FAO Rome from 13 to 17 November 1996 where delegations committed their

governments and civil society to a global attack on food insecurity and poverty Poultry like other short cycle animal stock is viewed by the FAO Special Programme for Food Security SPFS as a crucial element in the struggle for sustained food production and poverty alleviation The guidelines provided in this study are particularly pertinent to those countries participating in the SPFS where village chicken production will have a substantial impact on increased household food security and gender equity Foreword Biological Control of Gastro-intestinal Nematodes of Ruminants Using Predacious Fungi Food and Agriculture Organization of the United Nations,1998-01-01 Includes papers about Argentina Fiji India Indonesia Kenya Malaysia Mexico Paraguay Uruguay The Technology of Making Cheese from Camel Milk (Camelus Dromedarius) J.-P. Ramet,Food and Agriculture Organization of the United Nations,2001-01-01 Research has shown that the camel is the most efficient domestic animal for converting vegetative matter into work milk and meat Camel milk is already used for human consumption in its fresh or fermented forms or as butter but only rarely as cheese Camel milk is more technically difficult to process than milk from other domestic animals and some researchers have even claimed that camel milk cheese would be impossible to produce However if normal cheese making procedures are adapted to camel milk s particular characteristics satisfactory cheeses can be made The technology of making cheese from camel milk describes the composition of camel milk compares it with other milks and explains how it can be used to make cheese **Developing National Emergency Prevention Systems for Transboundary Animal Diseases** Alberto M. R. Dávila,Roberto Aguilar M. S. Silva,1997 *Livestock Keeping in Urban Areas* Hans Schiere,Rein van der Hoek,2001-01-01 Livestock play an important but variable role in both rural and urban societies At the request and with the support of the Japanese Government FAO has compiled experiences of livestock keeping from different parts of the world categorized by production systems to make it easier for interested people to select ideas for their own conditions This document presents a sample of such technologies intended for livestock keeping in urban and peri urban areas It describes the livestock production system in traditional sectors and identifies constraints Suggestions for improving production in the livestock sector are given and a literature list is included for further reference *A Technology Review* D. J. Alexander,Jonathan G. Bell,Robyn G. Alders,2004-01-01 Previously released in June 2004 and temporarily withdrawn Now available Keeping poultry contributes substantially to household food security throughout the developing world One of the principal constraints to increasing small scale poultry production is Newcastle Disease This acute viral disease can typically kill up to 80 percent of unprotected poultry in rural areas and is found throughout the developing world This technology review presents the latest understanding of Newcastle Disease its characteristics epidemiology symptoms and control It will be of practical value to state and private veterinarians and to all those involved with rural poultry production who wish to control this disease *Manual on Standards of Veterinary Services Meat Hygiene and Meat Inspection Post-mortem Judgment of Slaughter Animals and Establishment of Specific Disease-free Zones* Food and Agriculture Organization of the United Nations.
