2 Lightning and ESD Protection

Before mounting the EAP, you should consider lightning and ESD protection to ensure safety.

Proper grounding is a critical requirement for system devices. To reduce the damage of lightning lightning and ESD strikes, connect the grounding terminal to grounding facilities using a proper grounding wire which should meet the local installation requirements. You need to secure the grounding wire to the grounding terminal with the screw.

3 Hardware Installation

Mount the EAP

The EAP can be pole-mounted or wall-mounted. Follow the steps below for the hardware installation.

Option 1: Pole Mounting

Step 1:
Lead the end of the cable mounting wire through the back of the EAP.

Step 2:
Position the EAP and enter the cable mounting wire around the pole. Feed the wire through the screw-hole and tighten the screw until the EAP is secure.

Option 2: Wall Mounting

Step 1:
Place the mounting bracket for the EAP in the right position. Mark the positions for the screws.

Step 2:
Insert the plastic wall anchors into the 2 screw holes. Align the bracket for the EAP to the plastic wall anchors and insert the wall anchors into the screw holes through the bracket for the EAP.

Step 3:
Align the mounting plate on the back of the EAP with the end of the mounting bracket for the EAP. Push and slide the EAP downwards until it meets the plate.

Connect the Cable

Note: It is recommended that you read the EAP user manual and watch the installation video. If you have any trouble in the process, please follow the instructions below step by step.
