

Diabetes and MEDICATION ADHERENCE. Influencing factors.

Morisky Green 4-item;
EQ-5D-SL;
Logistic Regression

93 ambulatory
patients in General
Practitioner (GPs)
practice

Main conclusions:

1. High level of medication adherence among ambulatory patients with diabetes followed-up by GPs;
2. Longer duration of the diseases is related to higher level of adherence ($p < 0.05$);
3. The patients with more than 3 diseases, taking more than 5 medicines, women and those over 60 years of age were more adherent to prescribed therapy ($p > 0.05$).

- Low level of adherence in 2% of the observed patients;
- Years lived with diabetes (OR = 3.039, $p = 0.0258$):
 - Gender (OR = 1.7582, $p = 0.2$)
- Polypharmacy (OR = 1.3176, $p = 0.5267$);
- Multimorbidity (OR = 1.4416, $p = 0.4414$):
 - Age (OR = 1.2647, $p = 0.6153$)

Medication Adherence Insulin And Diabetes

Milward de Meiners

Medication Adherence Insulin And Diabetes:

Medication Adherence Among Type 2 Diabetes Texas Medicaid Patients Using Basal Insulin Hanxi Zhang (M.S. in Pharmaceutical Sciences), 2020 This study assessed adherence to three types of basal insulins neutral protamine Hagedorn NPH first and second generation long acting insulins This retrospective study used Texas Medicaid claims from 1 1 2014 6 30 2017 for patients 18 63 years with 2 basal insulin claims Patients also had 1 claim for an oral hypoglycemic agent OHA or a glucagon like peptide 1 receptor agonist GLP 1 RA 6 months pre index no claim for premixed insulin or basal insulin different from the index insulin 12 months post index and continuous enrollment The index date was the date of the first basal insulin claim without a claim 6 months prior Switchers were additionally required to have 2 pre index claims for a basal insulin The dependent variable was 12 month adherence to index insulin using both mean and dichotomized 0 8 threshold medication possession ratio MPR and adjusted MPR aMPR Bivariate and multivariate analyses were conducted A total of 5 034 patients were included the majority being between 40 63 years 85 5% and female 65 9% While only 28 2% of patients had MPR 0 8 60 0% had aMPR 0 8 After controlling for covariates compared to second generation long acting insulin there was a significantly lower odds of adherence using MPR to NPH odds ratio OR 0 590 95% confidence interval CI 0 372 0 935 and first generation long acting insulin OR 0 762 CI 0 589 0 985 whereas there was no difference in adherence using aMPR Other factors independently associated with better adherence irrespective of the measurement used MPR vs aMPR included older age pre index basal insulin use and better OHA adherence more unique baseline medications post index fewer unique OHAs bolus insulin use and GLP 1 RA use Vial delivery was associated with higher odds of adherence only when using MPR 0 8 Switchers included 218 patients switching to a longer acting insulin and 588 switchers within first generation long acting insulin Adherence improved significantly after switching except for the aMPR based adherence in switchers to a longer acting insulin Inconsistent results from MPR and aMPR and a lack of robustness of aMPR to sensitivity analyses suggested reliability issues with the measures Comparing adherence using aMPR requires similar baseline characteristics at minimum Future development of a reliable insulin adherence measure is needed *Behavioral Medicine and Integrated Care* Melanie P. Duckworth, William T. O'Donohue, 2018-10-12 This evidence to practice volume deftly analyzes the processes and skills of integrating mental healthcare with primary care using multiple perspectives to address challenges that often derail these joint efforts Experts across integrative medicine offer accessible blueprints for smoothly implementing data based behavioral interventions from disease management strategies to treatment of psychological problems into patient centered cost effective integrated care Coverage highlights training and technology issues key healthcare constructs that often get lost in translation and other knowledge necessary to create systems that are rooted in and contribute to a robust evidence base Contributors also provide step by step guidelines for integrating behavioral health care delivery in treating cancer dementia and chronic pain Among the topics covered The epidemiology of medical diseases and associated behavioral risk factors

Provider training recognizing the relevance of behavioral medicine and the importance of behavioral health consultations and referrals Screening for behavioral health problems in adult primary care Health care transformation the electronic health record Meeting the care needs of patients with multiple medical conditions Smoking cessation in the context of integrated care This depth of clinical guidance makes Behavioral Medicine and Integrated Care an essential reference for practitioners on all sides of the equation including health psychologists and other professionals in health promotion disease prevention psychotherapy and counseling and primary care medicine

2 Volumes

Care of People with Diabetes Trisha Dunning,Alan J. Sinclair,2020-04-06 Now in its fifth edition Care of People with Diabetes is a comprehensive clinical manual for nurses healthcare professionals and students alike providing an extensive summary of the most up to date knowledge in a rapidly developing field as well as the role of education and self care in achieving desirable outcomes Covering both the theory and evidence based practice of diabetes care this authoritative volume integrates traditional thinking and innovative concepts to challenge readers to think outside the box

when rendering care New and updated content on the pathophysiology of diabetes and the implications for management how to apply guideline recommendations in practice and contemporary evidence for best practice diabetes care Highlights personalised care and shared evidence based decision making emphasising the need for effective communication to reduce judgmental language and the negative effect it has on wellbeing and outcomes Written by internationally recognised experts in diabetes care research and education Includes a range of learning features such as practice questions key learning points diagrams and further reading suggestions Care of People with Diabetes is an essential companion to clinical practice for both trainee and experienced nurses and healthcare professionals particularly those in acute care settings and students undertaking diabetes courses or preparing for qualification exams *Adherence to Long-term Therapies* Eduardo Sabaté, World Health Organization, 2003 This report is based on an exhaustive review of the published literature on the definitions measurements epidemiology economics and interventions applied to nine chronic conditions and risk factors

Non-insulin Medication Poor Adherence in Diabetes: Data from a Brazilian National Survey, PNAUM Milward de Meiners, 2017 Evaluate self reported medication adherence from a large population based study among people with diabetes in Brazil During 2013 2014 the National Survey on Access Use and Promotion of the Rational Use of Medicines in Brazil with acronym PNAUM was realized Overall participants of the survey we selected for this study that which self reported diabetes The prevalence of diabetes was 6.8% among participants with 20 years old or more A univariate regression was performed to identify factors associated with poor medication adherence A 62.3% percent of participants reported good or probably good medication adherence and 37.7% poor or probably poor adherence The factors significantly associated with poor adherence were disease or healthcare related factors limitations from disease $p = 0.001$ poor self health perception $p = 0.008$ taking 3 or more medicines $p = 0.016$ and follow up by more than one physician $p = 0.011$ Medication adherence in a country with a high level of access to antihyperglycemic agents is necessary to reach effectiveness of healthcare resources Our study demonstrated that were necessary to improve adherence among persons with diabetes A better identification of those with poor adherence and their associated modifiable risk factors can guide health professionals to increase individualized therapeutic plans and improve healthcare quality *"I'm Going to Work with the Tools"* Jana Wardian, 2015 Nationally African Americans suffer disproportionately from diabetes with 13.2% of African Americans diagnosed with diabetes compared to 7.6% of non Hispanic whites CDC 2014 Nearly one half of all people with diabetes are non adherent to their oral medications adherence to insulin therapy was 60% 80% Brunton et al 2011 Cramer 2004 Rubin 2005 This study explored the question What mechanisms are associated with adherence to diabetes medication including insulin for African Americans in the Southwest Twenty three people participated in the study 17 participated in interviews and six participated in gendered focus groups A community based participatory research CBPR approach engaged the African American community as partners in research Major themes emerging from the data included illness perception support and the process of medication

adherence Acceptance of the diabetes diagnosis was imperative for medication adherence Stigmatization of diabetes was salient in the recruitment process and as it related to mechanisms for adherence Furthermore many informants were not aware of a family history of diabetes before their own diagnosis Four gendered emerging typologies were identified which further illuminated major themes Moreover an eight step process of medication adherence model is discussed The researcher was able to identify culturally compatible strategies that may be extended to those struggling with medication adherence The implications section suggests a set of strategies that healthcare providers can present to people with diabetes in order to increase medication adherence Pharmacist Services Jon Schommer,Anthony Olson,2019-11-04 The overall goal of this

book is to give the reader a state of the art synopsis of the pharmacist services domain To accomplish this goal the authors have addressed the social psychosocial political legal historic clinical and economic factors that are associated with pharmacist services In this book you will gain cutting edge insights from learning about the research of experts throughout the world The findings have relevance for enhancing pharmacist professionalism pharmacist practice and the progression of pharmacist services in the future **The Relationship Between Depressive Symptoms and Oral Antihyperglycemic**

25 additional chapters available online
The classic guide to driving optimal patient outcomes using evidence-based medication therapies, updated with the latest advances and guidelines. Presented in full color, *Pharmacotherapy: A Pathophysiologic Approach*, 11th Edition helps you deliver the highest quality patient care through evidence-based medication therapy derived from sound pharmacotherapeutic principles. It takes you beyond drug indications and dosages, showing how to properly select, administer, and monitor drugs. Everything you need to provide safe, effective drug therapy across all therapeutic categories. With all new monitoring tables and authoritative content from 300 expert contributors, this new edition has been fully updated to reflect the latest evidence-based information and recommendations. You'll find Key Concepts at the beginning of each chapter, Clinical Presentation tables that summarize disease signs and symptoms, and Clinical Controversies boxes that examine the complicated issues faced by students and clinicians in providing drug therapy. Why *Pharmacotherapy: A Pathophysiologic Approach* is perfect for students, pharmacists, and other healthcare providers. All chapters provide the most current, reliable, and relevant information available. Key concepts kick off every chapter. Clinical Presentation Tables summarize disease signs and symptoms. The majority of sections include personalized pharmacotherapy content. Clinical Controversies Boxes clarify the most complex drug therapy issues you'll face. Diagnostic flow diagrams, treatment algorithms, dosing recommendations, and monitoring approaches have been updated in full color to distinguish treatment pathways. Most disease-oriented chapters are enhanced by updated evidence-based treatment guidelines, which often include ratings of the level of evidence to support key therapeutic approaches. Instructors who adopt this text are eligible for a PowerPoint presentation of all images and answers to Self-Assessment Questions. The most trusted guide of its kind for decades, *Pharmacotherapy: A Pathophysiologic Approach* is the go-to text for students and practitioners seeking clear, objective coverage of core pathophysiologic and therapeutic elements. **FAMLI**, 1991
