

Applying a skin barrier and pouch

Fitting a skin barrier and ostomy pouch properly can be done in a few steps. Shown below is a two-piece pouching system with flanges.

1. Measure the stoma using a measuring guide.

2. Trace the appropriate circle carefully on the back of the skin barrier.

3. Cut the circular opening in the skin barrier. Smooth any rough edges with your finger.

4. Remove the backing from the skin barrier and apply barrier paste or moldable barrier ring, as needed, along the edge of the circular opening.

5. Center the skin barrier over the stoma, adhesive side down, and gently press it to the skin. When using a two-piece system, gently press the pouch opening onto the ring until it snaps into place.

6. Close the bottom of the pouch by folding the end upward and using the clip that comes with the product or close the integrated closure system.
