*The GPS Manual* Steve Dye, Frank Baylin, 1997      Embedded Robotics Thomas Bräunl, 2008-09-20 The EyeBot controller and mobile robots have evolved over more than a decade This book gives an in depth introduction to embedded systems and autonomous mobile robots using the EyeBot controller EyeCon and the EyeBot mobile robot family as application examples This book combines teaching and research material and can be used for courses in Embedded Systems as well as in Robotics and Automation We see labs as an essential teaching and learning method in this area and encourage everybody to reprogram and rediscover the algorithms and systems presented in this book Although we like simulations for many applications and treat them in quite some depth in several places in this book we do believe that students should also be exposed to real hardware in both areas embedded systems and robotics This will deepen the understanding of the subject area and of course create a lot more fun especially when experimenting with small mobile robots The original goal for the EyeBot project has been to interface an embedded system to a digital camera sensor EyeCam process its images locally in real time for robot navigation and display results on a graphics LCD All of this started at a time before digital cameras came to the market in fact the EyeBot controller was one of the first embedded vision systems Internet support at <http://robotics.ee.uwa.edu.au/eyebot> with free download of RoBIOS operating system example programs online documentation simulator      **Field & Stream** ,2004-10 FIELD STREAM America's largest outdoor sports magazine celebrates the outdoor experience with great stories compelling photography and sound advice while honoring the traditions hunters and fishermen have passed down for generations      **Popular Science** ,2006-01 Popular Science gives our readers the information and tools to improve their technology and their world The core belief that Popular Science and our readers share The future is going to be better and science and technology are the driving forces that will help make it better      Backpacker ,2001-10 Backpacker brings the outdoors straight to the reader's doorstep inspiring and enabling them to go more places and enjoy nature more often The authority on active adventure Backpacker is the world's first GPS enabled magazine and the only magazine whose editors personally test the hiking trails camping gear and survival tips they publish Backpacker's Editors Choice Awards an industry honor recognizing design feature and product innovation has become the gold standard against which all other outdoor industry awards are measured      **AIAA Flight Simulation Technologies Conference** ,1995      *Cruising World* ,2001-01
