Land Rover Discovery James Taylor, 2014-04-30 A quarter of a century ago, the Land Rover Discovery defined a stroke how traditional 4 x 4 all-terrain ability could co-exist with family estate practicality at an affordable price. Since 1989, the Discovery has gone through several iterations, but its essential qualities have remained unchanged. Practical, capable, and above all, completely distinctive, the stepped roof seemed odd at first but now defines the Discovery shape. The Discovery has gone on to become one of Land Rover's best-loved products. *Land Rover Discovery 25 Years of the Family* 4 x 4 looks in detail at the four generations of Discovery, including full specification details and production histories. Topics covered include the design and development of the original Discovery in the late 1980s and the move into North America, the new 300Tdi engine and R380 gearbox of 1994 and the BMW takeover. Series II models of 1998, 2004, and Land Rover's move from BMW to Ford. Discovery 3 LR3, 2004, 2009 and the new TDV6 engine developed by Jaguar. Discovery 4 LR4, the all-purpose family luxury car, special editions, and derivatives of all four generations of Discovery, including Discoverys for the emergency services and the Camel Trophy and G4 Challenge competition vehicles. Superbly illustrated with 351 colour photographs.

Geographical Targeting for Poverty Alleviation David Bigman, Hippolyte Fofack, 2000-01-01 In many developing countries, there are large differences in economic

conditions and the standard of living between regions and even between communities within the same region. In many countries poverty has a clear geographic dimension since the poor are often concentrated in pockets of poverty. Therefore the design of poverty alleviation policies must also have a significant spatial component. Although development projects are carefully designed and meticulously evaluated for cost effectiveness and benefits too many of them are not sufficiently targeted geographically. The growing availability and use of spatial data organized in a computer system such as a geographical information system GIS makes it more feasible to analyze the impact of projects in specific locales and to achieve more effective targeting. Geographical Targeting for Poverty Alleviation introduces the basic concepts of a GIS. It also demonstrates how to organize geographic and nongeographic data. In addition it presents different methods for using the data of the Household Income and Expenditure Survey together with other surveys and the population census to provide estimates for the standard of living and the incidence of poverty incidence in different geographical areas of a country. Ultimately these estimates should be used to establish guidelines for targeting poverty alleviation projects. This publication illustrates different GIS applications for identifying the project's target population determining the project's spatial sphere of influence or deciding where to locate public facilities. This publication is of interest to task managers economists development researchers and geographers. Quaternary Deserts and Climatic Change A.S. Alsharhan, K.W. Glennie, G.L.
