Macroeconomics Charles Jones Manual:

Instructor's Manual, Charles I. Jones, Macroeconomics, Second Edition Anthony J. Laramie, Garrett Jones, 2011

Macroeconomics Jones, Charles I, 2013-12-13 Macroeconomics is the first text to truly reflect today's macroeconomy. In this teachable, coherent book, the author makes complex topics easily understandable for undergraduates and combines innovative treatment of both the short run and the long run with a strong emphasis on problem solving. *The Innovation Paradox* Xavier Cirera, William F. Maloney, 2017-10-02 Since Schumpeter, economists have argued that vast productivity gains can be achieved by investing in innovation and technological catch-up. Yet as this volume documents, developing country firms and governments invest little to realize this potential, which dwarfs international aid flows. Using new data and original analytics, the authors uncover the key to this innovation paradox: the lack of complementary physical and human capital factors, particularly firm managerial capabilities that are needed to reap the returns to innovation investments. Hence, countries need to rebalance policy away from R and D centered initiatives, which are likely to fail in the absence of sophisticated private sector partners toward building firm capabilities and embrace an expanded concept of the National Innovation System that incorporates a broader range of market and systemic failures. The authors offer guidance on how to navigate the resulting innovation policy dilemma as the need to redress these additional failures increases with distance from the frontier. Government capabilities to formulate and implement the policy mix become weaker. This book is the first volume of the World Bank Productivity Project, which seeks to bring frontier thinking on the measurement and determinants of productivity to global policy makers. **Approaching Equality** Roger A. McCain, 2017-05-26 Drawing on some recent research, especially that of Piketty and his associates, and on older ideas, particularly from Sir Arthur Lewis, Roger McCain proposes policies that together would aim to reverse the observed tendency towards the concentration of wealth in market economies, thus approaching equality. The shortcomings and dangers of rising wealth inequality are discussed both from the point of view of increasing instability and of equalitarian values. **Macroeconomic Policy Modelling of African Economies** Charles Chukwuma Soludo, 1998 **Macroeconomics** Charles D. DeLorme, Robert Burton Ekelund, 1983 *Macroeconomics* Richard G. Lipsey, 1990 The goal of this book has always been to provide readers with a solid introduction to the economic issues facing the world today, using the methods economists use to study those issues and the policy problems that those issues create. This revision includes updated information on such key issues as health care, distribution of income, unemployment, labor, and monetary policy. The authors have also greatly increased the focus on the international economy and economic growth. Copyright Libri GmbH. All rights reserved.
