The Geography of South Africa Jasper Knight, Christian M. Rogerson, 2018-10-03 This edited collection examines contemporary directions in geographical research on South Africa. It encompasses a cross section of selected themes of critical importance not only to the discipline of Geography in South Africa but also of relevance to other areas of the Global South. All chapters are original contributions providing a state of the art research baseline on key themes in physical human and environmental geography and in understanding the changing geographical landscapes of modern South Africa. These contributions set the scene for an understanding of the relationships between modern South Africa and the wider contemporary world including issues of sustainable development and growth in the Global South. *Handbook of Research on Social, Cultural, and Educational Considerations of Indigenous Knowledge in Developing Countries* Ngulube,

Patrick, 2016-09-29 Knowledge systems are an essential aspect to the preservation of a community's culture. In developing countries, this community-based knowledge has significant influence on such things as decision making and problem solving. The *Handbook of Research on Social Cultural and Educational Considerations of Indigenous Knowledge in Developing Countries* is an authoritative reference source for the latest scholarly research on the importance of knowledge and value systems at the community level and ways indigenous people utilize this information. Highlighting impacts on culture and education in developing nations, this book is ideally designed for researchers, academicians, policy makers, students, and professionals interested in contemporary debates on indigenous knowledge systems. **Higher grounds** Patience Adjekai Sowa, PhD, Rachel Jordan, Wendi Ralaingita, Benjamin Piper, 2021-05-23 To address chronically low primary school completion rates and the disconnect between learners' skills at the end of primary school and the skills learners need to thrive in secondary school, identified in many low and middle income countries, more investment is needed to improve the quality of teaching and learning in upper primary grades. Accordingly, we provide guidelines for improving five components of upper primary education: 1. In-service teacher professional development and pre-service preparation to improve and enhance teacher quality; 2. a focus on mathematics literacy and core content area subjects; 3. assessment for learning; 4. high quality teaching and learning materials; and 5. positive school climates. We provide foundational guiding principles and recommendations for intervention design and implementation for each component. Additionally, we discuss and propose how to structure and design pre-service teacher preparation and in-service teacher training and ongoing support, fortified by materials design and assessment to help teachers determine where learners are in developmental progressions, move learners towards mastery and differentiate and support learners who have fallen behind. We provide additional suggestions for integrating a whole school climate, curriculum, social emotional learning, and school-related gender-based violence prevention strategies to address the internal and societal changes learners often face as they enter upper primary.
