Maths Lit Paper 2 June 2013:

Restoring Opportunity Greg J. Duncan, Richard J. Murnane, 2014-01-01 In this landmark volume Greg J Duncan and Richard J Murnane lay out a meticulously researched case showing how in a time of spiraling inequality strategically targeted interventions and supports can help schools significantly improve the life chances of low income children The authors offer a brilliant synthesis of recent research on inequality and its effects on families children and schools They describe the interplay of social and economic factors that has made it increasingly hard for schools to counteract the effects of inequality and that has created a widening wedge between low and high income students Restoring Opportunity provides detailed portraits of proven initiatives that are transforming the lives of low income children from prekindergarten through high school All of these programs are research tested and have demonstrated sustained effectiveness over time and at significant scale Together they offer a powerful vision of what good instruction in effective schools can look like The authors conclude by outlining the elements of a new agenda for education reform Restoring Opportunity is a crowning contribution from these two leading economists in the field of education and a passionate call to action on behalf of the young people on whom our nation s future depends Copublished with the Russell Sage Foundation

An Age of Accountability John L. Rury, 2023-10-13 An Age of Accountability highlights the role of test based accountability as a policy framework in American education from 1970 to 2020 For more than half a century the quest to hold schools and educators accountable for academic achievement has relied almost exclusively on standardized assessment The theory of change embedded in almost all test based accountability programs held that assessment with stipulated consequences could lead to major improvements in schools This was accomplished politically by proclaiming lofty goals of attaining universal proficiency and closing achievement gaps which repeatedly failed to materialize But even after very clear disappointments no other policy framework has emerged to challenge its hegemony The American public today has little confidence in institutions to improve the quality of goods and services they provide especially in the public sector As a consequence many Americans continue to believe that accountability remains a vital necessity even if educators and policy scholars disagree

Schluer,2025-08-05 The book Digital Feedback in the Research Planning Process Peers Pedagogies and Technologies offers a comprehensive exploration of how iterative dialogic peer review supports academic inquiry at Master s and doctoral levels To capitalize on participants heterogeneity the pedagogical design integrates peer scaffolding within an inquiry based inverted classroom approach that is situated in an open digitally mediated feedback environment Drawing on empirical data from the TESOL Research Colloquium this study investigates three asynchronous digital feedback formats cloud based digital boards recorded audio visual files and online forum exchanges across successive phases of research planning from topic generation to proposal presentation The triangulation of student perceptions feedback analyses and course evaluations confirms the efficacy of the pedagogical design while highlighting the need for redefined roles of students and supervisors targeted training in pro active feedback exchanges and strategic tool selection based on communicative affordances Rich with practical suggestions and transferable frameworks this book equips teacher educators and researchers with actionable insights to promote student agency peer learning and the competent use of digital technologies including Artificial Intelligence in higher education

Effectiveness of teachers' guides in the Global South Benjamin Piper,Yasmin

Sitabkhan,Jessica Mejia,Kellie Betts,2018-05-10 This report presents the results of RTI International Education s study on teachers guides across 13 countries and 19 projects Using quantitative and qualitative methods we examine how teachers guides across the projects differ and find substantial variation in the design and structure of the documents We develop a scripting index so that the scripting levels of the guides can be compared across projects The impact results of the programs that use teachers guides show significant impacts on learning outcomes associated with approximately an additional half year of learning showing that structured teachers guides contribute to improved learning outcomes During observations we find that teachers make a variety of changes in their classroom instruction from how the guides are written showing that the utilization of structured teachers guides do not create robotic teachers unable to use their own professional skills to teach children Unfortunately many changes that teachers make reduce the amount of group work and interactivity that was described in the guides suggesting that programs should encourage teachers to more heavily utilize the instructional routines designed in the guide The report includes a set of research based guidelines that material developers can use to develop teachers guides that will support effective instructional practices and help improve learning outcomes The key takeaway from the report is that structured teachers guides improve learning outcomes but that overly scripted teachers guides are somewhat less effective than simplified teachers guides that give specific guidance to the teacher but are not written word for word for each lesson in the guide

The Game Believes in You Greg Toppo,2025-06-25 What if schools

from the wealthiest suburban nursery school to the grittiest urban high school thrummed with the sounds of deep immersion

More and more people believe that can happen with the aid of video games Greg Toppo's *The Game Believes in You* presents the story of a small group of visionaries who for the past 40 years have been pushing to get game controllers into the hands of learners Among the game revolutionaries you'll meet in this book A game designer at the University of Southern California leading a team to design a video game version of Thoreau's Walden Pond A young neuroscientist and game designer whose research on Math Without Words is revolutionizing how the subject is taught especially to students with limited English abilities A Virginia Tech music instructor who is leading a group of high school aged boys through the creation of an original opera staged totally in the online game Minecraft Experts argue that games do truly believe in you They focus inspire and reassure people in ways that many teachers can't Games give people a chance to learn at their own pace take risks cultivate deeper understanding fail and want to try again right away and ultimately succeed in ways that too often elude them in school This book is sure to excite and inspire educators and parents as well as provoke some passionate debate
