Excerpt #1: "When in the course of human events it becomes necessary for one people to dissolve the political bands which have connected them with another and to assume, among the powers of the earth, the separate and equal station to which the laws of nature and of nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the cause which impel them to the separation."	
Excerpt #2: "We hold these truths to be self-evident, that all men are created equal; that they are endowed with certain unalienable rights, that among these are life, liberty, and the pursuit of happiness."	
Excerpt #3: "[T]o secure these [basic] rights, governments are instituted among men, deriving their just powers from the consent of the governed..."	
Excerpt #4: "[T]hat whenever any form of government becomes destructive [in protecting rights and responding to the people], it is the right of the people to alter or abolish it, and to institute a new government..."

due to social pressures that arise in group situations or through extremists deliberately shaping public opinion Detailed theoretical analysis of the final opinion distribution is followed by use of the model to study Asch s seminal experiments on conformity and the phenomenon of pluralistic ignorance Second the DeGroot Friedkin model for evolution of an individual s social power self confidence is developed in a number of directions The key result establishes that an individual s initial social power is forgotten exponentially fast even when the network changes over time eventually an individual s social power depends only on the changing network structure Last a model for the simultaneous discussion of multiple logically interdependent topics is proposed To ensure that a consensus across the opinions of all individuals is achieved it turns out that the interpersonal interactions must be weaker than an individual s introspective cognitive process for establishing logical consistency among the topics Otherwise the individual may experience cognitive overload and the opinion system becomes unstable Conclusions of interest to control engineers social scientists and researchers from other relevant disciplines are discussed throughout the thesis with support from both social science and control literature ASNE American Society of Newspaper Editors. **Tranquillitas Ordinis** George Weigel,1987 In recent years Roman Catholic bishops and activists have been highly visible in the public debate over issues such as nuclear arms control and U S policy in Central America Until now however the evolution of American Catholic thought on these questions has received little attention This book is the first comprehensive critical analysis of American Catholic thought on war and peace The author s purpose is to evaluate the post Vatican II transformation of the Church s approach to war peace issues and to point a wiser direction for its future development The book begins with a survey of American Catholicism s rich and sophisticated heritage of moral reasoning on war peace and political community In a major reinterpretation of American Catholic history Weigel shows how the American Bishops development of a theology of democracy in the nineteenth and twentieth centuries enriched the Church s classic understanding of peace as political community Weigel thus challenges the now prominent idea that the U S Catholic bishops were not seriously involved in the war peace debate until the last decade A highlight of the book is its detailed intellectual portrait of John Courtney Murray S J whom Weigel calls the finest political theorist ever produced by the American Church Weigel then demonstrates how over the past generation American Catholic intellectuals and publicists began to abandon their heritage and thereby impoverished the theological and political argument over war and peace security and freedom The book analyzes the ideas of seven key figures in the transformation of the American Catholic war peace debate Dorothy Day Gordon Zahn Thomas Merton Daniel and Philip Berrigan James Douglass and J Bryan Hehir and critically explores the U S bishops recent involvement with nuclear and Central American policy Recovering and developing the classic American Catholic heritage Weigel argues is essential to creating a wiser theology and politics whose concern for both peace and
