Maxim Korea July 2013:

Asia in Post-Western Age, 2014-09-15 The great geopolitician Halford J Mackinder had the dream that Monsoon Asia when it grows to prosperity will balance those who live between Missouri and the Yenisei In Asia in Post Western Age Niraj Kumar offers a vivid picture of the global distribution of material power and the emergence of three pan regions envisaged by German Nazi geopolitician Karl Haushofer fuelled by the logic of regionalised globalisation These pan regions will be glued by corresponding Pan Ideas of Atlanticism Eurasianism and Asianism The trialectics between these three pan regions will establish harmony and balance The diplomacy in multipolar world will no longer be deciphered through the sports metaphor of chess football or boxing but the universal game of hopscotch Asia in Post Western Age is an indispensable interdisciplinary work about contemporary global conflicts as well as future trends and proposes a way to establish Kant's perpetual peace

Strategic Cyber Deterrence Scott Jasper, 2017-07-08 According to the FBI about 4000 ransomware attacks happen every day In the United States alone victims lost 209 million to ransomware in the first quarter of 2016 Even worse is the threat to critical infrastructure as seen by the malware infections at electrical distribution companies in Ukraine that caused outages to 225 000 customers in late 2015 Further recent reports on the Russian hacks into the Democratic National Committee and subsequent release of emails in a coercive campaign to apparently influence the U S Presidential Election have brought national attention to the inadequacy of cyber deterrence The U S government seems incapable of creating an adequate strategy to alter the behavior of the wide variety of malicious actors seeking to inflict harm or damage through cyberspace This book offers a systematic analysis of the various existing strategic cyber deterrence options and introduces the alternative strategy of active cyber defense It examines the array of malicious actors operating in the domain their methods of attack and their motivations It also provides answers on what is being done and what could be done by the government and industry to convince malicious actors that their attacks will not succeed and that risk of repercussions exists Traditional deterrence strategies of retaliation denial and entanglement appear to lack the necessary conditions of capability credibly and communications due to these malicious actors' advantages in cyberspace In response the book offers the option of adopting a strategy of active cyber defense that combines internal systemic resilience to halt cyber attack progress with external disruption capacities to thwart malicious actors' objectives It shows how active cyber defense is technically capable and legally viable as an alternative strategy for the deterrence of cyber attacks

Investment Treaties and the Rule of Law Promise N. Jansen Calamita, Ayelet Berman, 2022-10-06 Investment treaties are said to improve the rule of law in the states which enter into them Fearing claims governments will internalise international investment obligations into their decision making processes resulting in positive spill over effects on the rule of law Such arguments have never been backed by empirical research This book presents an analytical framework for thinking about the internalisation of international commitments in governmental decision making that takes account of the complexities of governance In so doing it provides a

typology of processes whereby international treaty obligations may be internalised by governments and identifies factors which may affect whether and to what extent international commitments are internalised in governmental decision making This framework serves as the background for the main body of the book in which empirical case studies address whether and how a select group of governments in Asia internalise international investment treaty obligations in their decision making

Strategic Reassurance and Resolve James Steinberg, Michael E. O'Hanlon, 2015-08-25 How the United States and China can avoid future conflict and establish stable cooperative relations After forty years of largely cooperative Sino U S relations policymakers politicians and pundits on both sides of the Pacific see growing tensions between the United States and China Some go so far as to predict a future of conflict driven by the inevitable rivalry between an established and a rising power and urge their leaders to prepare now for a future showdown Others argue that the deep economic interdependence between the two countries and the many areas of shared interests will lead to more collaborative relations in the coming decades In this book James Steinberg and Michael O Hanlon stake out a third less deterministic position They argue that there are powerful domestic and international factors especially in the military and security realms that could well push the bilateral relationship toward an arms race and confrontation even though both sides will be far worse off if such a future comes to pass They contend that this pessimistic scenario can be confidently avoided only if China and the United States adopt deliberate policies designed to address the security dilemma that besets the relationship between a rising and an established power The authors propose a set of policy proposals to achieve a sustainable relatively cooperative relationship between the two nations based on the concept of providing mutual strategic reassurance in such key areas as nuclear weapons and missile defense space and cyber operations and military basing and deployments while also demonstrating strategic resolve to protect vital national interests including in the case of the United States its commitments to regional allies
