Institutional Interconnections and Cross-Boundary Cooperation in Inclusive Business Yoshitaka Okada, Sumire Stanislawski, 2021-11-05 Institutional Interconnections and Cross Boundary Cooperation in Inclusive Business explores the nature and characteristics of institutional interconnections in inclusive business and how these connections can be developed to help alleviate poverty through business activities in developing countries

**Political Economy and the Aid Industry in Asia** J. Hutchison, W. Hout, C. Hughes, R. Robison, 2015-12-25 Adopting a distinctive structural political economy approach this book uniquely explains the blind spots of alternative political economy approaches to international aid and presents an original framework for evaluating likely reformers strength of commitment and potential alliances with donors

**Oxford EAP Intermediate/ B1+ Student Book** Edward de Chazal, John Hughes, 2015-08-13 Oxford English for Academic Purposes offers a specialist course covering listening speaking and reading in key areas of academic life such as lectures presentations and textbooks The course is consistent with levels A2 to C1 of the Common European Frame of Reference for the teaching of foreign languages Great downloadable resources to support you when using Oxford English for Academic Purposes can be found at <https://elt.oup.com/student/oxfordeap>

**Measuring and Accounting for Innovation in the Twenty-First Century** Carol Corrado, Jonathan Haskel, Javier Miranda, Daniel Sichel, 2021-05-12 Measuring innovation is a challenging task both for researchers and for national statisticians This task is timely and valuable given that policy and public interest in innovation has become increasingly intense in this era of digital revolution yet National GDP Accounts and other economic statistics do not fully account for the wide range of innovative activity that is plainly evident in everyday experience Indeed innovation has in many ways changed the structure of an increasingly digitized marketplace from cloud computing to the gig economy The papers collected in this volume Measuring and Accounting for Innovation in the Twenty First Century address many different dimensions of this challenge ranging from how to best to define GDP to the fundamental question of what is an innovation and how to collect data at the level of an individual innovation Taken together the volume provides a comprehensive overview of the cutting edge of this widely varied but thematically connected research that draws on multiple methodologies and data The editors and authors consider how measurement frameworks could be expanded to enhance our understanding of innovative activity new approaches and evidence that could account for innovation s economic impact innovation s effect across the economy from production processes to labor markets and financial activities and what practical adjustments could be made to current measurements that would better capture innovation The distinctive stance of this volume makes clear that the challenge of measuring innovation and understanding its implications has become increasingly complex as the economy has evolved The editors and authors show that the limitations of our existing measurement system significantly hinder researchers analysts and policymakers Better measures of innovative activity are necessary to interpret the consequences of innovation in daily life and to inform policies that best promote the attendant benefits including

distribution of income trademark protections and more Now in an era of fake news and alternative facts it is more important than ever to push for accuracy in basic economic facts

**Arab Middle Class**, 2014 The present report studies the Arab middle class an important social group that is relatively little understood despite the fundamental role it has played in shaping the economic and social development outcomes in the Arab region This report contributes to the ongoing debate about factors that led to the Arab uprisings and the difficult transitions to democracy that followed the departure of long standing dictators by marking elements influencing middle class allegiances specifically those that weakened their well established alliances with ruling regimes The report is motivated by the conviction on the basis of past development experiences that a new Arab development model can only succeed if the middle class plays a lead role in designing and implementing processes of economic transformation and political transition Studying the middle class is therefore crucial to interpreting the past understanding the present and reading the potential future development prospects of the Arab region This report introduces three novel approaches aimed at charting a path for sustaining empowering and enlarging the middle class The first is related to the measurement of the middle class based on a definition that takes into account both the quantity and quality of their consumption expenditure The second relates to the profiling of the Arab middle class using variables such as education employment and mobility in addition to multidimensional poverty The third novel approach lies in using these results to provide a narrative of the socioeconomic context of the decade leading up to the uprisings from a middle class perspective The report concludes that the empowerment of the Arab middle class could pave a way out of the current development and governance debacle towards an Arab developmental State Publisher's description

**The Universal Social Safety-Net and the Attack on World Poverty** Anthony Clunies-Ross, Mozammel Huq, 2013-10-30 The book is concerned with strategy and tactics for directing that small slice of world income into filling the gap This must be done country by country on the initiative of each country's government with the maximum involvement of its own civil society and with the rich world also making a contribution To add momentum the international community needs to adopt targets far more specific than the fifty percent extreme poverty reduction of the first Millennium Development Goal

**Microfinance and Financial Inclusion** Eugenia Macchiavello, 2017-07-20 Following the recent global financial crisis there is a growing interest in alternative finance and microfinance in particular as new instruments for providing financial services in a socially responsible way or as an alternative to traditional banking Nonetheless correspondingly there is also a lack of clarity about how to regulate alternative financial methods particularly in light of the financial crisis lessons on regulatory failure and shadow banking's risks This book considers microfinance from a legal and regulatory perspective Microfinance is the provision of a wide range of financial services particularly credit but also remittances savings to low income people or financially excluded people It combines a business structure with social inspiration often resorts to technological innovations to lower costs Fintech e.g. crowdfunding and mobile banking and merges with traditional local experiences e.g. financial

cooperatives and Islamic finance this further complicating the regulatory picture The book describes some of the unique dimensions of microfinance and the difficulties that this can cause for regulators through a comparative analysis of selected European Union EU countries regimes The focus is in fact on the EU legal framework with some references to certain developing world experiences where relevant The book assesses the impact and validity of current financial regulation principles and rules in light of the most recent developments and trends in financial regulation in the wake of the financial crisis and compares microfinance with traditional banking The book puts forward policy recommendations for regulators and policy makers to help address the challenges and opportunities offered by microfinance
