

# How to Master Manual Transmission Driving?

01

Practice finding the clutch bite point in a flat, empty parking lot until you can consistently start the car without stalling. Slowly release the clutch pedal and stop when you feel the car begin to move.

When shifting gears, aim to change between 2,500 and 3,500 RPM for optimal performance. Monitor your tachometer and shift before the needle enters the red zone to avoid over-revving the engine.

02

03

To prevent riding the clutch, remove your foot completely from the clutch pedal after completing a gear change. Rest your left foot on the footrest or floor when not actively using the clutch to extend the life of your clutch components.
