

3-25. Transmission

In designing the T 200 transmission, utmost attention was paid to the intensity of gears and pinions. Dog-with-dog engaging system instead of dog-with-hole system is employed with the exception of the low gear, which needs no dog hole to be machined into free gears and pinions and thus making it possible for the center part of them to be thickened. Through adoption of this system, the transmission has been doubly intensified.

T 200
