Engelbergers prediction has yet to come to pass However he did correctly foresee the growth in non traditional applications of robots Robots are now beginning to march from the factories and into field and service applications This book presents a selection of papers from the first major international conference dedicated to field and service applications of robotics This selection includes papers from the leading research laboratories in the world together with papers from companies that are building and selling new and innovative robotic technology It describes interesting aspects of robots in the field ranging from mining agriculture construction cargo handling subsea operations removal of landmines to terrestrial exploration It also covers a diverse range of service applications such as cleaning propagating plants and aiding the elderly and handicapped and gives considerable attention to the technology required to realise robust reliable and safe robots
