Multidimensional Journal Evaluation Stefanie Haustein, 2012-04-26

Scientific communication depends primarily on publishing in journals. The most important indicator to determine the influence of a journal is the Impact Factor. Since this factor only measures the average number of citations per article in a certain time window, it can be argued that it does not reflect the actual value of a periodical. This book defines five dimensions which build a framework for a multidimensional method of journal evaluation. The author is winner of the Eugene Garfield Doctoral Dissertation Scholarship 2011.

Improved, extended, and total impact factor of a journal Florentin Smarandache, 2021-06-03

In this short paper we recall the Garfield Impact Factor of a journal, we improve and extend it and eventually we present the Total Impact Factor that reflects the most accurate impact factor.

How to Publish a Scientific Paper in a High Impact Factor Journal David Smith, 2018-05-02

High impact factor publications are absolutely necessary for advancing an academic science career, but unless you are already part of an elite insider's club, no one will help you succeed. Public advice is generic and unhelpful because editorial gatekeepers will not openly admit that the publication system is unfairly biased against you. Instead, the myth of meritocracy promotes the false notion that great science is all you need to publish well. Welcome to a realistic and practical look at how to publish your scientific paper in a high impact factor journal. From designing your research proposal to writing a rebuttal, this book discusses strategies for a top publication. This is not another regurgitated book about writing scientific manuscripts. This book covers the difficult parts that are left out or unspoken by others. It fills in the missing gaps. This book is not for researchers in well-funded laboratories at top institutes who are already well-versed in these issues. This

is a book for scientists everywhere else for the ones who may never have a fair chance but who still deserve the best chance

Science and Technology Text Mining Ronald N. Kostoff, Henry J. Eberhart, Darrel R.
