Novel and Intelligent Digital Systems: Proceedings of the 5th International Conference (NiDS 2025) Akrivi Krouska, Phivos Mylonas, Jaime Caro, 2025-10-02 This book presents the research contributions from the 5th International

Conference on Novel and Intelligent Digital Systems NiDS 2025 held in Athens Greece on September 24-26, 2025 and hosted by the University of West Attica. Continuing the success of previous editions, NiDS 2025 embraced a hybrid format enabling global participation both onsite and online. The conference focused on cutting-edge developments in intelligent and adaptive digital systems with particular emphasis on the role of Artificial Intelligence (AI) and its transformative impact on software engineering, digital applications, and human-centered technologies. NiDS 2025 provided a high-impact platform for scholars, researchers, and practitioners to present original research, exchange ideas, and engage in dialogue across a wide range of disciplines from computational intelligence and data science to smart systems and emerging digital infrastructures. By fostering interdisciplinary collaboration, NiDS 2025 strengthened global research networks and promoted innovation that bridges academia and industry. This collection is a valuable resource for those interested in the future of intelligent digital systems and the evolving challenges of AI-driven development.

Data Analytics and Applications of the Wearable Sensors in Healthcare Shabbir Syed-Abdul, Luis Fernandez Luque, Pei-Yun Sabrina Hsueh, Juan M. García-Gómez, Begoña García-Zapirain, 2020-06-17. This book provides a collection of comprehensive research articles on data analytics and applications of wearable devices in healthcare. This Special Issue presents 28 research studies from 137 authors representing 37 institutions from 19 countries. To facilitate the understanding of the research articles, we have organized the book to show various aspects covered in this field, such as eHealth technology, integrated research, prediction models, rehabilitation studies, prototype systems, community health studies, ergonomics, design systems, technology acceptance, model evaluation studies, telemonitoring systems, warning systems, application of sensors in sports studies, clinical systems, feasibility studies, geographical location-based systems, tracking systems, observational studies, risk assessment studies, human activity recognition systems, impact measurement systems, and a systematic review. We would like to take this opportunity to invite high-quality research articles for our next Special Issue entitled "Digital Health and Smart Sensors for Better Management of Cancer and Chronic Diseases" as a part of Sensors journal.

ITI 2000 Damir Kalpić, Vesna Hljuz Dobrić, 2000. Coaching Female Athletes Fraser Carson, Khatija Bahdur, Tihana Nemcic Bojic, 2025-11-24. Interest in women's sport has increased in recent years. This has resulted in more attention and in-depth discussions around increasing opportunities and access for female sports participants across all levels of sport. The 2024 Olympic Games in Paris will be the first Olympics to achieve gender parity with an equal number of male and female participants anticipated to compete. Competitions such as the FIFA Women's World Cup and the Netball World Cup were features of women's sports in 2023. These events have seen more female athlete role models emerge. There is evidence showing that female participation in sports is increasing across different sports and different levels of participation. An increase in female participants is accompanied by an increase in coaches who are coaching females. Women's sports might bear some similarities to the male equivalents but social, economic, physiological, and psychological differences as well as alterations in sports rules are factors for consideration. Given the

differences approaches tools of success experiences and obstacles facing coaches of female athletes it stands to reason that evidence based coaching recommendations and guidelines should be suitably nuanced to account for inherent variability present between women s and men s sports Further research is still needed to understand the factors underpinning the enhancement of coaching within women s sport This Research Topic aims to build on the existing scientific literature on coaching female athletes Specifically we welcome papers that address Coach education to meet the needs of female athletes Needs and experiences of coaches coaching female athletes Evolution of approaches related to coaching female athletes Considerations and adaptations when coaching female athletes at the grassroots level Coaching the recreational female athlete Coaching high performance female athletes Mentorship of coaches of female athletes
