Literary Theory Jonathan D. Culler, 2005 **Material Inscriptions** Andrzej Warminski, 2013-06-07 A new work of scholarship in the practice of rhetorical reading This monograph provides readings of literary and philosophical texts that work through the rhetoric of tropes to the material inscription at the origin of these texts The book focuses on the practice and pedagogical value of rhetorical reading Its readings follow an itinerary from poetic texts such as those by Wordsworth and Keats through theoretical or philosophical texts by Descartes and Nietzsche to narrative fiction by Henry James The book also contains two essays on Paul de Man and literary theory and an interview on the topic of Deconstruction at Yale All three of these latter texts are explicitly about the inescapable function and importance of the rhetoric of tropes for any critical reading or literary study worthy of the name As Andrzej Warminski demonstrates rhetorical reading is a species of deconstructive reading in the full de Manian sense but one that rather than harkening back to a past over and done with would open the texts to a different future

Critical Theory: A Very Short Introduction Stephen Eric Bronner, 2011-03-18 Critical Theory emerged in the 1920s from the work of the Frankfurt School the circle of German Jewish academics who sought to diagnose and if at all possible cure the ills of society particularly fascism and capitalism In this book Stephen Eric Bronner provides sketches of leading representatives of the critical tradition such as George Lukács and Ernst Bloch Theodor Adorno and Walter Benjamin Herbert Marcuse and Jürgen Habermas as well as many of its seminal texts and empirical investigations This Very Short Introduction sheds light on the cluster of concepts and themes that set critical theory apart from its more traditional philosophical competitors Bronner explains and discusses concepts such as method and agency alienation and reification the culture industry and repressive tolerance non identity and utopia He argues for the introduction of new categories and perspectives for illuminating the obstacles to progressive change and focusing upon hidden transformative possibilities Only a critique of critical theory can render it salient for a new age That is precisely what this very short introduction provides

Comparative Literature: A Very Short Introduction Ben Hutchinson, 2018-02-22 Comparative Literature is both the past and the future of literary studies Its history is intimately linked to the political upheavals of modernity from colonial empire building in the nineteenth century via the Jewish diaspora of the twentieth century to the postcolonial culture wars of the twenty first century attempts at comparison have defined the international agenda of literature But what is comparative literature Ambitious readers looking to stretch themselves are usually intrigued by the concept but uncertain of its implications And rightly so in many ways even the professionals cannot agree on a single term calling it comparative in English compared in French and comparing in German The very term itself when approached comparatively opens up a Pandora's box of cultural differences Yet this in a nutshell is the whole point of comparative literature To look at literature comparatively is to realize just how much can be learned by looking over the horizon of one's own culture it is to discover not only more about other literatures but also about one's own and it is to participate in the great utopian dream of understanding the way nations and languages interact In an age that is paradoxically defined by migration and border crossing on the one hand and by a retreat into monolingualism and monoculturalism on the other the cross cultural agenda of comparative literature has become increasingly central to the future of the Humanities We are all in fact comparatists constantly making connections across languages cultures and genres as we read The question is whether we realise it This Very Short Introduction tells the story of Comparative Literature as an agent of international relations from

the point of view both of scholarship and of cultural history more generally Outlining the complex history and competing theories of comparative literature Ben Hutchinson offers an accessible means of entry into a notoriously slippery subject and shows how comparative literature can be like a Rorschach test where people see in it what they want to see Ultimately Hutchinson places comparative literature at the very heart of literary criticism for as George Steiner once noted to read is to compare ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable
