Literature Waec 2014 Answer:

Data for Learning World Bank Group, 2017-09-21 Data are a crucial ingredient in any successful education system but building and sustaining a data system are challenging tasks. Many countries around the world have spent significant resources but still struggle to accomplish a functioning Education Management Information System (EMIS). On the other hand, countries that have created successful systems are harnessing the power of data to improve education outcomes. Increasingly, EMISs are moving away from using data narrowly for counting students and schools. Instead, they use data to drive system-wide innovations, accountability, professionalization, and most important, quality and learning. This broader use of data also benefits classroom instruction and support at schools. An effective data system ensures that education cycles from preschool to tertiary are aligned and that the education system is monitored so it can achieve its ultimate goal: producing graduates able to successfully transition into the labor market and contribute to the overall national economy. *Data for Learning: Building a Smart Education Data System* and its forthcoming companion volume shed light on challenges in building a data system and provide actionable direction on how to navigate the complex issues associated with education data for better learning outcomes and beyond. *Data for Learning* details the key ingredients of successful data systems, including tangible examples, common pitfalls, and good practices. It is a resource for policy makers working to craft the vision and strategic road map of an EMIS, as well as a handbook to assist teams and decision makers in avoiding common mistakes. It is designed to provide the how-to and to guide countries at various stages of EMIS deployment. A forthcoming companion volume will focus on digging deeper into the practical applications of education data systems by various user groups in different settings.

Linguistique africaine : perspectives croisées Jean Léo Léonard, Annie Rialland, 2018-09-11 Le volume *Linguistique africaine perspectives croisées* réunit des spécialistes de langues africaines représentatifs de l'avancement de la recherche sur les langues d'Afrique subsaharienne dans le cadre d'une étroite collaboration entre deux sociétés savantes prestigieuses, la Société de Linguistique de Paris (SLP) et la Société de Linguistique d'Afrique de l'Ouest (SLAO). Les thèmes traités concernent aussi bien la diachronie que la synchronie, la typologie phonologique, la tonologie et la morphologie flexionnelle, que la théorie de l'onomatopée ou encore l'interface phonologie-syntaxe, l'outillage de langues minoritaires, l'aide de nouvelles technologies ou la documentation des langues en danger dans des situations d'hyperdiversité sociolinguistique, comme c'est le cas en Afrique occidentale. Les contributions de ce volume sont importantes non seulement du point de vue théorique et méthodologique en linguistique africaine, comme en linguistique générale, pour l'approche par interfaces entre phonologie et morphosyntaxe, lexicale et grammaticale, sémantique et onomatopée, mais aussi du point de vue d'une distanciation critique vis-à-vis des modèles existants ou qui ont longtemps dominé le champ de recherches sans le recul réflexif endogène nécessaire. C'est un dialogue riche et fécond qu'on assiste entre chercheurs européens de la SLP et chercheurs africains de la SLAO grâce à une alternance entre études de cas spécifiques ou études pilotes et analyses de phénomènes de grande échelle que ce soit sur le plan géographique.

ou du point de vue pist mologique aboutissant une polyphonie aussi bien empirique que th orique
