Socialization in International Students Deniz Ortactepe, 2012-11-16 The relationship between language and culture has been the focus of attention in the fields of anthropology applied linguistics sociolinguistics and sociology especially in regard to the acquisition of language and negotiation of identity Schieffelin and Ochs 1986 framework of language socialization in this respect has inspired a variety of research each of which approaches individuals socialization processes from a different perspective Second language L2 acquisition research has also benefited from this framework to explore L2 learners linguistic and social development in the target language culture This volume offers a new perspective to analyze L2 socialization Since adult L2 learners have already acquired the norms and values of their native culture through first language socialization Kecskes 2002 Matsumura 2001 their experience with the L2 leads to conceptual blending and restructuring of what they already have Therefore the present book talks about conceptual socialization Kecskes 2002 a theoretical framework that is proposed in this study to refer to the process that L2 learners go through in becoming members of the target language community The aim of the study presented in this volume is to explore the process of conceptual socialization by

investigating its impact on international students social and linguistic development Both qualitative and quantitative methods were used to identify and explore the changes in the students social and linguistic repertoire While there is a plethora of research on English as second language learners and short term study abroad students within the field of applied linguistics and interlanguage pragmatics the trajectories of long term international students who pursue graduate degrees abroad remain untold Considering the increasing number of international students in the US and the challenges awaiting them in the new sociocultural environment this volume plays a substantial role in exploring the process that international students go through as a result of their conceptual socialization The findings presented in this book will not only shed light on how international students become socialized into the target culture s linguistic and sociocultural repertoires but will also provide recommendations for the prospective international students so as to facilitate their conceptual socialization process

Teaching and Learning Pragmatics Noriko Ishihara, Andrew D. Cohen, 2021-09-30 An understanding of sociocultural context is crucial in second language learning yet developing this awareness often poses a real challenge to the typical language learner This book is a language teachers guide that focuses on how to teach socially and culturally preferred language for effective intercultural communication Moving beyond a purely theoretical approach to pragmatics the volume offers practical advice to teachers with hands on classroom tasks included in every chapter Readers will be able to Understand the link between language use linguacultural diversity and multilingual identity Identify possible causes of learner errors and choices in intercultural communication Understand applied linguistics theories that support culturally sensitive classroom practices Develop a pragmatics focused instructional component classroom based assessments and curricula Help learners to become more strategic about their learning and performance of speech acts Incorporate technology into their approach to teaching pragmatics This book aims to close the gap between what research in pragmatics has found and how language is generally taught today It will be of interest to all language teachers graduate students in language teaching and linguistics teacher educators and developers of materials for teaching language
