## **Le Corps Incertain:**

Corpus Jean-Luc Nancy, 2008 How have we thought the body How can we think it anew The body of mortal creatures the body politic the body of letters and of laws the mystical body of Christ all these and others are incorporated in the word Corpus the title and topic of Jean Luc Nancy s masterwork Corpus is a work of literary force at once phenomenological sociological theological and philosophical in its multiple orientations and approaches In thirty six brief sections Nancy offers us at once an encyclopedia and a polemical program reviewing classical takes on the corpus from Plato Aristotle and Saint Paul to Descartes Hegel Husserl and Freud while demonstrating that the mutations technological biological and political of our own culture have given rise to the need for a new understanding of the body He not only tells the story of this cultural change but also explores the promise and responsibilities that such a new understanding entails The long awaited English translation is a bold bravura rendering To the title essay are added five closely related recent pieces including a commentary by Antonia Birnbaum dedicated in large part to the legacy of the mind body problem formulated by Descartes and the challenge it poses to rethinking the ancient problems of the corpus The last and most poignant of these essays is The Intruder Nancy s philosophical meditation on his heart transplant The book also serves as the opening move in Nancy s larger project called The deconstruction of Christianity

**French subject islands** Elodie Winckel, 2024-06-20 This book examines extractions out of the subject which is traditionally considered to be an island for extraction There is a debate among linguists regarding whether the subject island constraint is a syntactic phenomenon or an illusion caused by cognitive or pragmatic factors The book focusses on French that provides an interesting case study because it allows certain extractions out of the subject despite not being a typical null subject language The book takes a discourse based approach and introduces the Focus Background Conflict constraint which posits that a focused element cannot be part of a backgrounded constituent due to a pragmatic contradiction The major novelty of this proposal is that it predicts a distinction between extractions out of the subject in focalizing and non focalizing constructions The central contribution of this book is to offer the detailed results of a series of empirical studies corpus studies and experiments on extractions out of the subject in French These studies offer evidence for the possibility of extraction out of the subject in French But they also reveal a clear distinction between constructions While extractions out of the subject are common and highly acceptable in relative clauses this is not the case for interrogatives and clefts Finally the book proposes a Head Driven Phrase Structure Grammar HPSG analysis of subject islands It demonstrates the interaction between information structure and syntax using a representation of information structure based on Minimal Recursion Semantics MRS Selected Writings Guillaume Apollinaire, 1950
