## **Lived Time Phenomenological And:**

**Lived Time** Eugene Minkowski, 2019-06-17 Eugene Minkowski's *Lived Time* articulates a phenomenology of time that is as inspired by the philosophical writings of Henri Bergson and Edmund Husserl as it is by the psychiatric descriptions of Eugen Bleuler. After providing a phenomenological description of the experience of time in normal life, Minkowski considers a number of mental illnesses including schizophrenia, manic depression, and dementia, and he attempts to show that these pathological cases can be characterized in terms of a distortion of lived time and space. First published in French in 1933 as *Le temps vécu*, this edition of this classic work of phenomenological psychiatry and psychopathology includes a new foreword by Dan Zahavi that presents some of Minkowski's main ideas and discusses his contemporary relevance. **Edmund**

... David Joe Ragan, 1965 *Topologies of Fear in Contemporary Fiction* Scott McClintock, 2015-07-21 The central concern of the book is the impact of global terror networks and state counterterrorism on twentieth-century fiction. A unique contribution of this book is the comparative approach as opposed to the single-author focus of most of the edited collections on terrorism in literature.

**Humanizing Child Developmental Theory** Eugene M. DeRobertis, 2008 According to many introductory psychology textbooks, Westerners are placing an increasingly high value on the welfare of their children. This humanistic cultural shift has not found its way into developmental psychology courses at the college level, leaving a vital gap in curriculum at many universities. Until now, from a fresh holistic perspective, psychology professor Eugene M. DeRobertis applies humanistic viewpoints in psychology to the study of child development. Unlike most child development texts that concentrate on the subdivisions of the child's personality, the observations and discussions here focus on the child as a whole. Drawing upon many schools of thought including American humanism, existential phenomenology, psychoanalysis, neo-analytic theories, object relations theory, self psychology, and Gestalt psychology, Dr. DeRobertis opens an important dialogue to all teachers and students of psychology. Packed with illustrations, empirical findings, references, and key terms and concepts, *Humanizing Child Developmental Theory* delivers an overarching theoretical framework for putting developmental issues into context. A significant and accessible contribution to developmental theorizing, this groundbreaking text gives psychology instructors and their students a relevant and much-needed humanistic approach to child development. Narrative and

Identity Athena E. Gorospe, 2007 Using key features of Ricoeur's narrative theory, this creative Asian re-reading of Moses' reverse migration in Exodus 4:18-26 charts the way for a multi-dimensional OT hermeneutic which explores the theme of identity formation in light of the liminal experience of migration. **Phenomenology World-Wide** Anna-Teresa

Tymieniecka, 2014-11-14 Phenomenology is the philosophy of our times. Through the entire twentieth century, this philosophy unfolded and flourished following stepwise the intrinsic logic and dynamism of its original project as proposed by its founder, Edmund Husserl. Now its seminal ideas have been handed over to a new era. The worldwide contributors to this volume make

it manifest that phenomenological inspiration knows no cultural barriers It penetrates and invigorates not only philosophical disciplines but also most of the sectors of knowledge transforming our way of seeing the world our actions toward others and our lives Phenomenology's universal spread has however oftentimes diluted its original sense even beyond recognition and led to a weakening of its dynamics There is at present an urgent need to retrieve the original understanding of phenomenology to awaken its dormant forces and redirect them This is the aim of the present book resourcement and reinvigoration It is meant to be not only a reference work but also a guide for research and study To restore the authentic vision of phenomenology we propose returning to its foundational source in Husserl's project of a universal science unpacking all its creative capacities In the three parts of this work there are traced the stages of this philosophy's progressive uncovering of the grounding levels of reality ideal structures constitutive consciousness the intersubjective lifeworld and beyond The key concepts and phases of Husserl's thought are here exfoliated Then the thought of the movement's classical figures and of representative thinkers in succeeding generations is elucidated Phenomenology's geographic spread is reviewed We then proceed to the culminating work of this philosophy to the phenomenological life engagements so vigorously advocated by Husserl to the life significant issues phenomenology addresses and to how it has enriched the human sciences Lastly the phenomenological project's new horizons on the plane of life are limned horizons with so powerful a draw that they may be said not to beckon but to summon Here is the movement's vanguard This collection has 71 entries Each entry is followed by a relevant bibliography There is a helpful Glossary of Terms and an Index of Names

**Time, Death, and Eternity** Richard James Severson, 1995-09-06 In Book XI of the Confessions Augustine claims that time has its beginning and ending in eternity In Being and Time Heidegger claims that death is the ultimate futural possibility for authentic human existence These two texts one from the fourth century the other from the twentieth century depict two very different perspectives on what limits the human conception of time Can these perspectives be reconciled Severson offers a new reading of the Confessions that affirms Augustine's religious quest for understanding while taking into account the constraints of modern criticism Phenomenology and Educational Discourse, 1997 **Metaphors of**

**Consciousness** Ronald S. Valle, Rolf von Eckartsberg, 1981 As we move into the 1980s there is an increasing awareness that our civilization is going through a profound cultural transformation At the heart of this transformation lies what is often called a paradigm shift a dramatic change in the thoughts perceptions and values which form a particular vision of reality The paradigm that is now shifting comprises a large number of ideas and values that have dominated our society for several hundred years values that have been associated with various streams of Western culture among them the Scientific Revolution of the seventeenth century The Enlightenment and the Industrial Revolution They include the belief in the scientific method as the only valid approach to knowledge the split between mind and matter the view of nature as a mechanical system the view of life in society as a competitive struggle for survival and the belief in unlimited material

progress to be achieved through economic and technological growth All these ideas and values are now found to be severely limited and in need of radical revision

**Person-centred Nursing Research: Methodology, Methods and Outcomes**

Jan Dewing, Brendan McCormack, Tanya McCance, 2021-04-26 This book is the first ever to offer a contemporary collection of different perspectives on person centredness in international doctoral nursing research The research in the book is based on the ideas and values of personhood and person centeredness which have been used and can be seen to guide research approaches inform research designs and theorize research findings Further a specific framework for person centred nursing is embedded throughout the research studies presented in the text The Person centred Nursing Framework PCNF developed by Brendan McCormack and Tanya McCance in 2010 is recognized as a nursing theory and this book further develops it as a basis for research and for advancing person centredness in nursing The framework informs all stages of the research process from design through to dissemination The book is structured into a number of highly engaging chapters written by doctoral candidates and recently graduated candidates The opening and closing chapters written by the editors place the subsequent chapters in a global context of person centredness and nursing The potential for person centred nursing research to be a global movement is recognized and debated The subsequent chapters lead readers through philosophical ideas methodologies and methods whilst also offering reflective and honest insights into learning how to become a person centred researcher This field is growing and developing but yet there is no specific book available As a result researchers spend considerable time and effort translating existing research methodologies into person centred perspectives This book fills this gap and acts as a key resource for future nurse researchers The text is intended for and benefits nursing doctoral candidates masters candidates and academic staff who teach and supervise research candidates it may also appeal to other graduate learners The book has international contributions which makes it appealing internationally div

**Time and Timelessness, Or, The Varieties of Temporal Experience** Peter Hartocollis, 1983

**Crosscurrents in Phenomenology** R. Bruzina, Bruce W. Wilshire, 1978-07-31 One of the greatest and oldest of images for expressing living change is that of the movement of waters Rivers particularly in their relentless motion in the constant searching direction of their travel in the confluence of tributaries and the division into channels by which identity is constituted and dispersed and once more reestablished have stood as metaphors for movements in a variety of realms politics religion literature thought Among philosophic movements phenomenology and existentialism are discernible as one such movement of ideas analogous in configuration to the flow of a river in its channel or network of channels The course taken by the stream of phenomenology and existential philosophy in North America is easily seen from the contents of the six volumes of collected papers from the annual meetings of the Society for Phenomenology and Existential Philosophy that have preceded the present selection What soon becomes clear in general and is evident as well in the present volume is that phenomenological and existential philosophies are far from being homogeneous are far from showing an identity as to the sources from which they derive their

energy or the themes that they carry forward toward clarification And yet there is a confluence a convergence of orientation sympathy and conceptuality INTRODUCTION 4 SO that problematics harmonize and complement and mutually enrich

**American Philosophical Quarterly** Nicholas Rescher,2002 Existentialism and Phenomenology Leonard Orr,1978 The compiling of a bibliography requires both a thorough knowledge of the subject and the ability to discriminate effectively Success depends as much on the clear definition of focus as on the evaluation of the texts considered Orr succeeds on each count thereby rendering an invaluable service to students and scholars alike Particularly interesting is the inclusion of works devoted to the interrelatedness of existentialism and the political and social sciences And extremely helpful are the notations referring the researcher to sections of a work either of particular significance or pertinent to a specific point of view An excellent introduction emphasizes the movement away from the fundamental ontological concerns of existential thought Orr s effort to resituate the research within the original dimensions of existentialism and phenomenology as exploratory processes as opposed to intellectual systems is most commendable FRENCH REVIEW *Home and Beyond* Anthony J. Steinbock,1995 At a time in which many philosophers have concluded that Husserl s philosophy is exhausted but when the alternatives to Husserl appear to be exhausted as well this work aims to presents an innovative approach to Husserlian phenomenology The author implicitly attacks the most fundamental criticism aimed at Husserl that his philosophy is intrinsically formalistic unable in principle to deal with concrete matters of life and how to live it This study of the problems and themes of a generative phenomenology normality and abnormality and the sociohistorical concepts of homeworld and generative phenomenology opens doors for a philosophy of the social world while casting new light on work done by Husserl himself
