to evaluate by yourself how the actual conditions in which you work affect technical properties that your laptop or tablet should possess. Thus you will be able to choose the best laptop or tablet for you. I also assess in this guide the impact of different technical properties on the price of laptops and tablets. Using that information it will be easier for you to decide to which particular property you are sticking to and which you are ready to give up due to the increased price of the device. You may have your own idea about a laptop or tablet most suitable for writing. In spite of that I strongly recommend you to confront your expectations with mine. In this guide I indicate numerous specific requirements you might have not considered yet. In addition it is always worth it to verify or supplement your preferences before making a final decision to buy an often expensive device. Let me underline that in this guide I do not use any brand names, names of laptops, tablets or companies producing them. Instead I provide specific technical properties which the laptop or tablet suitable for writing should possess. The chapters of this guide are ordered in accordance with the priorities which in my opinion should be given to individual properties of the laptop or tablet suitable for writers. In this way while reading the following chapters you will be able to gradually precise your requirements regarding screen type and size, type of the processor, disk, keyboard and other. The conclusion coming from all given advices are two recommended specifications: one for the laptop and second for the tablet. Both specifications which I present in the last chapter of this guide should meet the writers' expectations. If you decide to buy both a laptop and a tablet the provided specifications will complement each other.
