But Will It Fly? Iver P. Cooper, 2025-09-17 Conventional aircraft today are propelled by the action of propellers or jets and powered by the internal combustion of petroleum fuels in piston turboprop or jet engines But other power sources powerplants and propulsion devices for airships as well as aircraft have been proposed and even experimented with over the last few centuries The power sources considered include human muscles steam batteries nuclear reactors and hydrogen fuel and the propulsion devices include sails oars flapping wings rockets and cycloidal propellers This meticulously researched book presents the history of these unconventional aerial power and propulsion systems explains the underlying science and technology behind them and assesses the crucial question of practicality

Trade Agreements at the Crossroads Susy Frankel, Meredith Lewis, 2013-11-20 The book examines trade agreements in the context of the current world economic crisis and the uncompleted World Trade Organization WTO Doha Round of trade negotiations With economies shrinking and protectionism on the rise many fear a protracted global recession This raises important questions as to what role trade agreements multilateral plurilateral and bilateral should be playing in the current climate of uncertainty and how best to plan for a more stable economic future Previous assumptions are now being questioned making this an opportune time to critically examine the WTO free trade agreements bilateral investment treaties and other international economic law instruments Furthermore participants in international agreements are concerned with emerging issues that have the potential to strengthen or weaken the global trading system including matters of treaty interpretation terms of new agreements and effects of existing provisions This book provides a timely addition to the international economic law literature as its submissions have been prepared during a time of unusual uncertainty and economic change individuals interested in international economic law will seek scholarship that recognizes the current international economic climate This book should be of interest to a wide range of academics and student researchers as well as policymakers and practitioners

Junkyards, Gearheads, and Rust David N. Lucsko, 2016-05-15 The material appeal of the automobile junkyard goes beyond the search for second hand parts What happens to automobiles after they are retired but before they are processed as scrap In this fascinating history David N Lucsko takes readers on a tour of salvage yards and wrecked or otherwise out of service cars in the United States from the point of view of gearheads the hot rodders restoration hobbyists street rodders and classic car devotees who reuse repurpose and restore junked cars Junkyards Gearheads and Rust is a nuanced exploration of the business of dismantling wrecks and selling second hand parts It

examines the reinterpretation of these cars and parts by artists as well as their restoration by enthusiasts It also surveys the origin and evolution of gearhead oriented yards that specialize in specific types of automobiles dissects the material and emotional appeal of the salvage yard and its contents among enthusiasts and examines how zoning and nuisance ordinances have affected both salvage businesses and hobbyists Lucsko concludes with an analysis of efforts during the last twenty five years to hasten vehicular obsolescence at the expense of salvage yards mechanics and enthusiasts By examining how cars are salvaged repurposed and restored this book demonstrates that the history of the automobile is much more than a running catalog of showroom novelties

The Flight of Icarus Yiannis Drossos,2020-12-10 This book provides a detailed analysis of the institutional transformations brought about by the financial crisis focusing on the institution building course of Europe and the Constitution bending course in several Member States It discusses the seemingly contradictory interplay between national and European institutions and the law resulting from the crisis arguing that the anti crisis exceptionality constitutes the matrix of the new normality of the reformed European economic governance The author carries out a critical analysis of the new economic governance and its case law with regular reference to relevant political episodes key economic figures and to the hitherto lax modes and rules The author also offers deep insights into the Greek adjustment programme and the crisis related Greek and Portuguese constitutional case law presented in comparison with the German and French case law The book concludes with a critical overview of the profound mutations in the role of national Constitutions instigated by the new European economic governance and the emergence of a democratically deficient meta constitutional mode of functioning of both the European institutions and national Constitutions
