follow applicable government regulations is critical to providing safety for everyone affected by the transportation industry. Motor Carrier Safety simplifies the many complexities of legal compliance for the transportation of goods by highway. It provides you with the tools and focus required to achieve full regulatory compliance. The author examines current regulations to determine what issues and requirements pertain to such issues as hazardous materials, drugs, and alcohol, employee safety, and health. Bulleted lists present the regulations in a clear, easy-to-use format. You will understand the issues and be able to determine the specific regulations that affect your place of business. In addition to regulations and standards, this book covers points of training, record keeping, and suggestions for annual audits. Case studies relating to various regulations help you realize how either violating or complying will impact your business. These features combine to make Motor Carrier Safety the perfect vehicle for launching your in-house training program. The laws governing the transportation of goods by truck vary from agency to agency. Motor Carrier Safety makes clear the regulations and provides you with a practical source for complying with them. This book helps you to understand your regulatory exposure for non-compliance and guides you through the steps to becoming compliant.

General Accounting Office, 1985 **Motor Carrier Safety**, 2009. To reduce the number of crashes involving commercial motor carriers, the Federal Motor Carrier Safety Administration (FMCSA) within the Department of Transportation orders unsafe carriers out of service. To help keep these carriers off the road, FMCSA's voluntary Performance and Registration Information Systems Management (PRISM) grant program, a small program funded at 5 million dollars per year, helps states establish information systems connections between state vehicle registration and FMCSA's safety databases. These connections provide states with up-to-date information on carriers' safety status when carriers try to register or renew registrations with the state. For states to deny, suspend, or revoke registrations of out-of-service carriers, states must pass legislation enabling them to do so. As directed by a congressional committee, GAO examined 1) PRISM's effectiveness and 2) the potential to fully implement the program nationally. GAO reviewed FMCSA data and discussed PRISM with a wide variety of federal, state, industry, and safety stakeholders.
