architects in China famous architects that perhaps should be forgotten save for their bow ties collectors of Sherlock Holmes memorabilia outsider artists and clients and none of these things exactly Everywhere Derham Groves attends to and finds significance in the minutiae of everyday life inter association and those things that affect us so profoundly but remain just outside the purview of the normal And in these things objects art architecture environment s he finds stories and teaches his reader how to do the same Out of the Ordinary is also a motivational text It begins with bricks perhaps the most standardized and repeatable units of construction and reveals how they can be used as vehicles for unfettered creativity and not merely for the creation of containers Groves shows how art and architecture can emerge and receive nourishment from the garbage of the everyday and creative collisions Groves also calls albeit subtly for a turn away from homogeneity the standardized and unimaginative or lazy design informed by principles of economy efficiency utility and function conceived in abstraction Rather Groves celebrates the reanimation and or rejuvenation of place by the makers of anything out of the ordinary who don't necessarily pray to the demiurge of good taste who have created spaces and things through which the creative imagination shines Dr Andrew Chrystall School of Communication Journalism and Marketing Massey University
