**Equality in Kenya's 2010 Constitution** Victoria Miyandazi, 2021-02-25 This book makes a significant contribution to the ongoing global conversations on the various understandings of equality. It illuminates the many ways in which diverse equality guarantees clash or are interrelated. It also sets out principled approaches on how they can be coherently interpreted to address the myriad inequalities in Kenya. Taking a comparative approach, the book considers how other jurisdictions including the United States, United Kingdom, Canada, South Africa, India, and Botswana have approached the conceptualisation, interpretation, and application of various equality concepts. The book focuses on important issues such as transformative constitutionalism in relation to the interpretation of Kenya's 2010 Constitution, expanding the list of enumerated grounds for non-discrimination, affirmative action, accommodating religious and cultural diversity versus gender equality, the interrelation between socio-economic rights and status-based equality. *Research in Chemistry Education*

Liliana Mammìno, Jan Apotheker, 2021-05-17 This volume emphasizes the role of chemical education for development and in particular for sustainable development in Africa by sharing experiences among specialists across the African continent and with specialists from other continents. It considers all areas and levels of chemistry education, gives specific attention to known major challenges, and encourages explorations of novel approaches. The chapters in this book describe new teaching approaches, approach explorations, and in-class activities, analyse educational challenges and possible ways of addressing them, and explore cross-discipline possibilities and their potential benefits for chemistry education. This makes the volume an up-to-date compendium for chemistry educators and educational researchers worldwide. *Advancing Africa's Sustainable Development*

Alain L. Fymat, 2018-11-14 While many African countries lag behind the rest of the industrialised world in scientific and medical research and development, the situation is progressively improving. This is why the Society for the Advancement of Science in Africa was established to contribute to economic advancement and sustainability through science, research, education, and innovation. This book provides a selection of papers from the Advancement of Science in Africa's fourth annual conference. The conference was held under the overarching theme of science, technology, and innovation in Africa, with several important sub-themes including but not limited to improving health research and disease surveillance, education, collaborating in research, responding to epidemic diseases with high mortality in Africa, and promoting women's interest in science careers. The collection illustrates how, although the chapter contributors come from various countries and universities representing their own academic research, they all share a common interest in advancing science, technology, and innovation in Africa. **Facing Forward** Sajitha Bashir, Marlaine Lockheed, Elizabeth Ninan, Jee-Peng Tan, 2018-09-20 Facing Forward lays out a range of policy and implementation actions that are needed for countries in Sub-Saharan Africa to meet the challenge of improving learning while expanding access and completion of basic education for all.
