A Scientific Bibliography of the Drakensberg, Maloti and Adjacent Lowlands Rodney Moffett, 2021-04-19 This bibliography includes scientific articles on the Drakensberg Maloti and Adjacent Lowlands published between 1808 and 2019. Although focussing on material appearing in accredited journals, there is such a wealth of information in the form of unpublished yet traceable reports, documents, presentations and dissertations, these are also included. The bibliography has two parts: a complete list arranged alphabetically and the same references arranged in 33 different disciplines. These range from Palaeobotany with 17 entries to Rock Art with 502 entries.

Advances in the Study of Behavior Marc Naguib, 2021-04-27 *Advances in the Study of Behavior* Volume 53 provides users with the latest insights in this ever evolving field. New chapters in this release include Cooperative breeding in birds, Interactive singing in birds, What have we learned in the last 20 years, Pied babblers, Mate choice in frogs, Dogs and Do hosts of avian brood parasites discriminate parasitic vs predatory threats. A review Serves the increasing number of scientists engaged in the study of animal behavior. Makes another important contribution to the development of this important field. Presents theoretical ideas and research to those studying animal behavior and related fields.

The Palgrave Handbook of Africa and the Changing Global Order Samuel Ojo Oloruntoba, Toyin Falola, 2021-11-22 This handbook fills a large gap in the current knowledge about the critical role of Africa in the changing global order. By connecting the past, present and future in a continuum that shows the paradox of existence for over one billion people, the book underlines the centrality of the African continent to global knowledge production, the global economy, global security and global creativity. Bringing together perspectives from top Africa scholars, it actively dispels myths of the continent as just a passive recipient of external influences, presenting instead an image of an active global agent that astutely projects soft power. Unlike previous handbooks, this book offers an eclectic mix of historical, contemporary and interdisciplinary approaches that allow for a more holistic view of the many aspects of Africa's relations with the world.

Birds of Prey José Hernán Sarasola, Juan Manuel Grande, Juan José Negro, 2018-06-30 This book will provide the state of the art on most of the topics involved in the ecology and conservation of birds of prey. With chapters authored by the most recognized and prestigious researchers on each of the fields, this book will become an authorized reference volume for raptor biologists and researchers around the world.

Owl Monkeys Eduardo Fernandez-Duque, 2023-09-13 This book integrates three decades of owl monkey research conducted since 1994, when the first and only book focused on the genus *Aotus* was published. Owl monkeys were one of the least understood primates; then, knowledge from wild populations was only beginning to emerge, and there had been some substantial research in colonies of captive individuals. The situation is very different today. Research on captive owl monkeys has continued to develop with valuable contributions to the health and medical sciences. And there is now enough information on the behavior, ecology, conservation and biogeography of the genus that merits a synthesis. The book synthesizes new field data on the biogeography

behavioral ecology circadian biology population biology and demography spanning their entire continental range from Panama to Argentina. It includes theoretical perspectives drawn from evolutionary biology, biological anthropology, anatomy, morphology, and physiology, genetics, endocrinology, and conservation biology to examine a specific set of adaptations that have allowed owl monkeys to exploit the nocturnal niche while functioning in a pair living sexually monogamous system with remarkable patterns of paternal care. The author, with 30 years of research experience with both captive and wild primates, has directed the longest project on any owl monkey species and has conducted extensive original research on their biology, adaptive radiation, and behavioral ecology. His expertise and published record on both wild populations and laboratory colonies makes this book one of a kind; it presents information from both captive and wild primates and explores questions through the integration of both approaches. The volume offers some additional features that make it novel in its approach: 1. brings together a combination of senior researchers who during four decades have established captive owl monkeys as a system of study with a new generation of younger scientists who have for the last 10–20 years been spearheading their study in the wild; 2. presents the work of a remarkably diverse range of authors representing all countries where owl monkeys are present, as well as researchers from the U.S. and Europe; and 3. offers synthesis chapters. In doing so, it will surely become a reference book for those specifically drawn to owl monkeys as well as for those interested in the research topics that are covered.

Polymetallic Metallogenic System Liqiang Yang, 2019-09-18. Within the last decade, the high and continuing demand for precious and base metals, as well as critical elements, has prompted a global rush on a scale never before seen. This eventually resulted in the demand for considerable innovation and improvement in mineral deposit genetic modelling and ore formation regimes for the many different types of gold deposits now recognized and paralleled by the wide employment of exploration techniques and a rapid expansion of geological databases. This Special Issue will show case studies of porphyry polymetal systems, orogenic gold formations, water-rock reaction, ore-forming structure evolution, mineralogy, and petrology of ore deposit, ore formation regime, geochronology, and geochemistry of ore deposit, ore-forming evolution, mineral exploration, and cutting edge technology in ore deposit study.

A Scientific Bibliography of the Far Northern Drakensberg Rodney Moffett, 2023-04-14. This Scientific Bibliography of the Far Northern Drakensberg is a continuation by the AfriMontane Research Unit of the University of the Free State (ARU) to document published and other similar works on the mountains of the summer rainfall area of South Africa. It follows *A Scientific Bibliography of the Drakensberg, Maloti and Adjacent Lowlands* which was published in 2020 (Moffett 2020) and which covered the area between the North Eastern Cape and the North Eastern Free State. The current work extends this northward by including articles and publications dating back to 1875. E. Cohen on the Lydenburg goldfields reaching as far as the Wolkberg and Woodbush near Tzaneen in Limpopo Province. Figure 1 shows the boundary of the area covered and although referred to as the Far Northern Drakensberg in this work, it is identical to that described as the LMEE Limpopo Mpumalanga Eswatini Escarpment by Clarke.

et al 2022 Although slightly separate from the lower escarpment the mountainous Barberton and adjacent Eswatini area as well as the Leolo Mountains in eastern Sekhukhuneland are also included Details on how the boundary in figure 1 was determined are given in Clark et al 2022 Bibliographies on two further ranges in the summer rainfall area viz the Magaliesberg in Gauteng province and the Soutpansberg in Limpopo province are to be the subject of future compilations
