Hitmen for Hire Mark Shaw, 2017-07-10 Hitmen for Hire takes the reader on a journey like no other navigating a world of paid hitmen informers rogue policemen criminal taxi bosses gang leaders and crooked politicians and businessmen Criminologist Mark Shaw examines a society in which contract killings have become commonplace looking at who arranges hits where to find a hitman and even what it is like to operate as a hitman or woman Since 1994 South Africa has seen a worrying increase in the commercialisation of murder and has been rocked by several high profile contract killings Drawing on his research of over a thousand incidents of hired assassinations from 2000 to 2016 Shaw reveals how these murders are used to exert a mafia type control over the country s legal and illegal economic activity Contracted assassinations and the organised criminal activity behind them contain sinister linkages with the underworld most visibly in relation to disputes over tenders and access to government resources State security actors increasingly mediate relations between the under and upper worlds with serious implications for the long term success of the post apartheid democratic project

South Africa's Political Crisis Alexander Beresford, 2016-01-26 South Africa s current political upheavals are the most significant since the transition from apartheid Its powerful trade unions are playing a central role and the political direction they take will have huge significance for how we understand the role of labour movements in struggles for social justice in the twenty first century

SOUTH AFRICA AA.VV., 2016-11-14 Has the new South Africa once an inspiring rainbow nation failed the expectations it had generated Is the country now in a crisis Two decades after the end of the apartheid regime Africa s southernmost state faces multiple political economic and social challenges A lackluster growth performance is compounded by mounting corruption and political turbulence as well as by the frustration of many ordinary citizens who expected much more rapid social and economic improvement Labour strikes student protests and anti immigrant riots have all been on the rise As a clear sign of increasing dissatisfaction uncertainty and decline the ruling African National Congress recently ran into its worst electoral result ever if still only at local levels Meanwhile Jacob Zuma s embattled presidency marred by allegations of corruption and political cronyism sent South Africa s international image plummeting alongside the Rand the national

currency This volume sheds light on the current difficulties and discusses future prospects The new South Africa is a country in dire need for change *The Limits of the Green Economy* Anneleen Kenis, Matthias Lievens, 2015-03-24 Projecting win-win situations new economic opportunities green growth and innovative partnerships the green economy discourse has quickly gained centre stage in international environmental governance and policymaking Its underlying message is attractive and optimistic if the market can become the tool for tackling climate change and other major ecological crises the fight against these crises can also be the royal road to solving the problems of the market But how green is the green economy And how social or democratic can it be This book examines how the emergence of this new discourse has fundamentally modified the terms of the environmental debate Interpreting the rise of green economy discourse as an attempt to reinvent capitalism it unravels the different dimensions of the green economy and its limits from pricing carbon to emissions trading from sustainable consumption to technological innovation The book uses the innovative concept of post politics to provide a critical perspective on the way green economy discourse represents nature and society and their interaction and forecloses the imagination of alternative socio ecological possibilities As a way of repoliticising the debate the book advocates the construction of new political faultlines based on the demands for climate justice and democratic commons This book will be of interest to students and scholars of environmental politics political ecology human geography human ecology political theory philosophy and political economy Includes a foreword written by Erik Swyngedouw Professor of Geography Manchester University **The State of African Cities, 2014** United Nations Publications, 2015-09-10 The African continent is currently in the midst of simultaneously unfolding and highly significant demographic economic technological environmental urban and socio political transitions Africa's economic performance is promising with booming cities supporting growing middle classes and creating sizable consumer markets Despite significant overall growth the continent continues to suffer under very rapid urban growth accompanied by massive urban poverty and many other social problems These seem to indicate that the development trajectories followed by African nations since post independence may not be able to deliver on the aspirations of broad based human development and prosperity for all This report therefore argues for a bold reimagining of prevailing models in order to steer the ongoing transitions towards greater sustainability based on a thorough review of all available options That is especially the case since the already daunting urban challenges in Africa are now being exacerbated by the new vulnerabilities and threats associated with climate and environmental change **The State of African Cities, 2014** United Nations Human Settlements Programme, 2013 Nairobi UN Habitat c2014 9789211325980 **Proceedings of IAC in Prague 2025** Group of Authors, 2025-12-13 International Academic Education Global Education Teaching and Learning IAC GETL Economics Business and Marketing IAC MEBM Engineering Transport IT and Artificial Intelligence IAC ETITAI **Quarterly Bulletin** South African Reserve Bank, 2015 **Who's who of Southern Africa**, 2003 Vols for 1967-70 include as a section Who's who of Rhodesia Mauritius Central and East Africa

In The Shadow of Mandela Alexander Johnston,2019-12-12 This outstanding and original work goes to the heart of South Africa s political problems doubts as to the sustainability of the post apartheid settlement beset with divisions in the ruling ANC factionalism corruption and the widening of fault lines in state and society The leadership issue has become key and this will be the first specific examination of leadership in the light of Mandela s legacy and its effect on his successor as potential and actual leaders all in the shadow of Mandela as the architect of the transition from apartheid to democracy and with overarching moral authority and international reputation Alexander Johnston shows how his successors are judged against Mandela s achievements including the potentially impressive lost leaders and concentrating on his immediate successors Thabo Mbeki and Jacob Zuma The book concludes with an in depth assessment of new president Cyril Ramaphosa s potential to be a leader for a new dawn This is an objective and critical work by a close observer who acknowledges the achievement of South African leadership but is acutely aware of the doubts as to the sustainability of South Africa s hard won democratic settlement An essential read for all readers interested in leadership and in the traumatic history and future of Africa s leading state as the continent rises to global importance
