Advanced Surface Enhancement Sho Itoh, Shashwat Shukla, 2019-08-30 This book presents the proceedings of the first INCASE conference organised by ARTC at A STAR Singapore It provides a comprehensive review of recent advances in surface enhancement processes and strategies employed to assess their impact on materials properties and performance As cyber physical systems are becoming more and more relevant in manufacturing it focuses on assessing the readiness of current technologies for future transformations such as Industry 4 0 identifying the opportunities and challenges and exploring ways to address them Written by researchers practising engineering and industry experts the book bridges the gap between research and manufacturing promoting technology adoption in industry and innovative ideas to prepare it for the future

Dynamics in Logistics Herbert Kotzab, Jürgen Pannek, Klaus-Dieter Thoben, 2015-12-21 This contributed volume brings together research papers presented at the 4th International Conference on Dynamics in Logistics held in Bremen Germany in February 2014 The conference focused on the identification analysis and description of the dynamics of logistics processes and networks Topics covered range from the modeling and planning of processes to innovative methods like autonomous control and knowledge management to the latest technologies provided by radio frequency identification mobile communication and networking The growing dynamic poses wholly new challenges logistics processes and networks must be able to rapidly and flexibly adapt to constantly changing conditions The book primarily addresses the needs of researchers and practitioners from the field of logistics but will also be beneficial for graduate students

Computer-aided Technologies Razvan Udriou, 2016-12-07 The aim of this book is to present the latest applications trends and developments of computer aided technologies CAX Computer aided technologies are the core of product lifecycle management PLM and human lifecycle management HUM This book has seven chapters organized in two sections Computer Aided Technologies in Engineering and Computer Aided Technologies in Medicine The first section treats the different aspects of PLM including design simulations and analysis manufacturing production planning and quality assurance In the second part of the book are presented CAX applications in medicine focused on clinical decision diagnosis and biosensor design CAX plays a key role in a variety of engineering and medical applications bringing a lot of benefits in product life cycle extending and improving human life

Smart Trends in Computing and Communications Tomonobu Senjyu, Chakchai So-In, Amit Joshi, 2025-09-30 This book gathers high quality papers presented at the Ninth International Conference on Smart Trends in Computing and Communications SmartCom 2025 organised by Global Knowledge Research Foundation GR Foundation from 29 to 31 January 2025 in Pune India It covers state of the art and emerging topics in information computer communications and effective strategies for their use in engineering and managerial applications It also explores and discusses the latest technological advances in and future directions for information and knowledge computing and its applications Recent Global Research and Education: Technological Challenges Ryszard Jabłoński, Roman Szewczyk, 2016-09-22 Developments in

the connected fields of solid state physics bioengineering mechatronics and nanometrology have had a profound effect on the emergence of modern technologies and their influence on our lives In all of these fields understanding and improving the basic underlying materials is of crucial importance for the development of systems and applications The International Conference Inter Academia 2016 has successfully married these fields and become a regular feature in the conference calendar It consisted of seven thematic areas in the field of material science nanotechnology biotechnology plasma physics metrology robotics sensors and devices The book Recent Global Research and Education Technological Challenges is intended for use in academic government and industry R D departments as an indispensable reference tool for the years to come Also we hope that the volume can serve the world community as the definitive reference source in Advances in Intelligent Systems and Computing This book comprises carefully selected 68 contributions presented at the 15th International Conference on Global Research and Education INTER ACADEMIA 2016 organized by Faculty of Mechatronics Warsaw University of Technology on September 26 28 in Warsaw Poland It is the second volume in series following the edition in 2015 It brings together the knowledge and experience of 150 leading researchers representing 13 countries We would like to thank all contributors and reviewers for helping us to put together this book

ROBOTICS GURUPRASAD, K. R.,2019-09-01 This book focusses on one of the important classes of Robots known as manipulators or robotic arms and provides a thorough treatment of its kinematics dynamics and control The book also covers the problem of trajectory generation and robot programming The text apart from providing a detailed account of topics such as on taxonomy of robots spatial description of rigid bodies kinematics of manipulator concept of dexterous workspace concept of singularity manipulator dynamics using both the Newton Euler and Lagrangian approaches with a deeper insight into the manipulator dynamics manipulator control and programming additionally encompasses topics on motion planning intelligent control and distributed control of manipulators The book is an excellent learning resource for understanding the complexities of manipulator design analysis and operation It clearly presents ideas without compromising on the mathematical rigour

KEY FEATURES Full coverage of syllabi of all the Indian universities Based on classroom tested lecture notes Numerous illustrative examples Chapter end problems for brainstorming Primarily designed for students studying Robotics in undergraduate and postgraduate engineering courses in mechanical and mechatronics disciplines the book is also of immense value to the students pursuing research in robotics Instructor Resources PPTs and Solution Manual are also available for the faculty members who adopt the book
