Fundamentals of Computer Networks Matthew N. O. Sadiku, Cajetan M. Akujuobi, 2022-08-29 This textbook presents computer networks to electrical and computer engineering students in a manner that is clearer more interesting and easier to understand than other texts All principles are presented in a lucid logical step by step manner As much as possible the authors avoid wordiness and giving too much detail that could hide concepts and impede overall understanding of the material Ten review questions in the form of multiple choice objective items are provided at the end of each chapter with answers The review questions are intended to cover the little tricks which the examples and end of chapter problems may not cover They serve as a self test device and help students determine how well they have mastered the chapter OSPF and IS-IS Rui Valadas, 2019-01-15 This book describes and compares both the IPv4 and IPv6 versions of OSPF and IS IS It explains OSPF and IS IS by grounding the analysis on the principles of Link State Routing LSR It deliberately separates principles from technologies Understanding the principles behind the technologies makes the learning process easier and more solid Moreover it helps uncovering the dissimilarities and commonalities of OSPF and IS IS and exposing their stronger and weaker features The chapters on principles explain the features of LSR protocols and discuss the alternative design options independently of technologies The chapters on technologies provide a comprehensive description of OSPF and IS IS with enough detail for professionals that need to work with these technologies The final part of the book describes and discusses a large set of experiments with Cisco routers designed to illustrate the various features of OSPF and IS IS In particular the experiments related to the synchronization mechanisms are not usually found in the literature **ECCWS 2020 19th European Conference on Cyber Warfare and Security** Dr Thaddeus Eze, Dr Lee Speakman, Dr Cyril Onwubiko, 2020-06-25 These proceedings represent the work of contributors to the 19th European Conference on Cyber Warfare and Security ECCWS 2020 supported by University of Chester UK on 25 26 June 2020 The Conference Co chairs are Dr Thaddeus Eze and Dr Lee Speakman both from University of Chester and the Programme Chair is Dr Cyril Onwubiko from IEEE and Director Cyber Security Intelligence at Research Series Limited ECCWS is a well established event on the academic research calendar and now in its 19th year the key aim remains the opportunity for participants to share ideas and meet The conference was due to be held at University of Chester UK but due to the global Covid 19 pandemic it was moved online to be held as a virtual event The scope of papers will ensure an interesting conference The subjects covered illustrate the wide range of topics that fall into this important and ever growing area of research *Analytical and Stochastic Modeling Techniques and Applications* Khalid Al-Begain, Simonetta Balsamo, Dieter Fiems, Andrea Marin, 2011-06-12 This book constitutes the refereed proceedings of the 18th International Conference on Analytical and Stochastic Modeling Techniques and Applications ASMTA 2011 held in Venice Italy in June 2011 The 24 revised full papers presented were carefully reviewed and selected from many submissions The papers are organized in topical sections on queueing theory
