Limpopo Exams Grade9 2014:

The Politics and Governance of Basic Education Brian Levy, Robert Cameron, Ursula Hoadley, Vinodhan Naidoo, 2018-08-24

This is an open access title available under the terms of a CC BY NC ND 4.0 International licence. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. All over the world economic inclusion has risen to the top of the development discourse. A well performing education system is central to achieving inclusive development but the challenge of improving educational outcomes has proven to be unexpectedly difficult. Access to education has increased but quality remains low with weaknesses in governance comprising an important part of the explanation. *The Politics and Governance of Basic Education* explores the balance between hierarchical and horizontal institutional arrangements for the public provision of basic education. Using the vivid example of South Africa, a country that had ambitious goals at the outset of its transition from apartheid to democracy, it explores how the interaction of politics and institutions affects educational outcomes. By examining lessons learned from how South Africa failed to achieve many of its goals, it constructs an innovative alternative strategy for making process combining practical steps to achieve incremental gains to re-orient the system towards learning.

Transforming Public Education in Africa, the Caribbean, and the Middle East Cynthia S. Sunal, Kagendo Mutua, Oluseyi Matthew Odebiyi, 2019-05-01. Public education has expanded to serve large populations across the regions of Africa, the Caribbean, and the Middle East. Many nations in these regions are moving into a phase of public education in which a variety of factors are being identified as influencing the quality of public education and its ability to serve all children and adolescents. It has become evident that ethnic background, gender, religious affiliation, and ability/disability are important factors in who is served and how well the individual is served. The chapters in this volume, *Book 8 of Research on Education in Africa, the Caribbean, and the Middle East*, document and describe the status, success, and limitations of public education's efforts at transformation. They provide points from which further research and practice might occur.

Quality education Muchativugwa L. Hove, Martha Matashu, 2021-11-30. This book investigates the intersections between education, social justice, gendered violence, and human rights in South African schools and universities. The rich and multifarious tapestry of scholarship and literature emanating from South African classrooms provides a fascinating lens through which we can understand the complex consequences of the economies of education, social justice imperatives, gendered violence in the lives of women and children, and marginalised communities. The scholarship in the book challenges readers to imagine alternative futures predicated on the transformational capacity of a democratic South Africa. Contributors to this volume examine the many ways in which social justice and gendered violence mirror, express, project, and articulate the larger phenomenon of human rights violations in Africa and how, in turn, the discourse of human rights informs the ways in which we articulate, interrogate, conceptualise, enact, and interpret quality education. The book also wrestles with the linguistic contradictions and ambiguities in the articulation of quality education in public and private spaces. This book is

essential reading for scholars seeking a solid grounding in exploring quality education the instances of epistemic disobedience the political implications of place and power and human rights in theory and practice *Human Rights and Equality in Education* Fredman, Sandra, Campbell, Meghan, 2018-06-20 Thousands of children from minority and disadvantaged groups will never cross the threshold of a classroom What can human rights contribute to the struggle to ensure that every learner is able to access high quality education This brilliant interdisciplinary collection explores how a human rights perspective offers new insights and tools into the current obstacles to education It examines the role of private actors the need to hold states to account for the quality of education how to strike a balance between religion culture and education the innovative responses needed to guarantee girls right to education and the role of courts This unique book draws together contributors who have been deeply involved in this field from both developing and developed countries which enriches the understanding and remedial approaches to tackle current obstacles to universal education **The Praeger International Handbook of Special Education** Michael L.
