Limpopo Province Social Science History Exemplar 2014:

Genetic Afterlives Noah Tamarkin, 2020-09-11 In 1997 M E R Mathivha an elder of the black Jewish Lemba people of South Africa announced to the Lemba Cultural Association that a recent DNA study substantiated their ancestral connections to Jews Lemba people subsequently leveraged their genetic test results to seek recognition from the post apartheid government as indigenous Africans with rights to traditional leadership and land retheorizing genetic ancestry in the process In *Genetic Afterlives* Noah Tamarkin illustrates how Lemba people give their own meanings to the results of DNA tests and employ them to manage competing claims of Jewish ethnic and religious identity African indigeneity and South African citizenship Tamarkin turns away from genetics researchers results that defined a single story of Lemba peoples true origins and toward Lemba understandings of their own genealogy as multivalent Guided by Lemba people s negotiations of their belonging as diasporic Jews South African citizens and indigenous Africans Tamarkin considers new ways to think about belonging that can acknowledge the importance of historical and sacred ties to land without valorizing autochthony borders or other technologies of exclusion *Indigenous Archives in Postcolonial Contexts* Mpho Ngoepe, Sindiso

Bhebe, 2023-12-06 *Indigenous Archives in Postcolonial Contexts* revisits the definition of a record and extends it to include memory murals rock art paintings and other objects Drawing on five years of research and examples from Zimbabwe Botswana and South Africa the authors analyse archives in the African context Considering issues such as authentication ownership and copyright the book considers how murals and their like can be used as extended or counter archives Arguing that extended archives can reach people in a way that traditional archives cannot and that such archives can be used to bridge the gaps identified within archival repositories the authors also examine how such archives are managed and authenticated using traditional archival principles Presenting case studies from organisations such as Gay and Lesbian Memory in Action Archives GALA and heritage projects such as the Makgabeng Open Cultural Museum the authors also analyse Indigenous family praises and songs and explore how such records are preserved and transmitted to the next generation *Indigenous Archives in Postcolonial Contexts* demonstrates how the voices of the marginalised can be incorporated into archives Making an important contribution to the effort to decolonise African archives the book will be essential reading for academics and students working in archival studies library and information science Indigenous studies African studies cultural heritage history and anthropology *Metals in Past Societies* Shadreck Chirikure, 2015-03-18 This book seeks to communicate to both a global and local audience the key attributes of pre industrial African metallurgy such as technological variation across space and time methods of mining and extractive metallurgy and the fabrication of metal objects These processes were transformative in a physical and metaphoric sense which made them total social facts Because the production and use of metals was an accretion of various categories of practice a *chaine operateire* conceptual and theoretical framework that simultaneously considers the embedded technological and anthropological factors was used The

book focuses on Africa's different regions as roughly defined by cultural geography. On the one hand there is North Africa, Egypt, the Egyptian Sudan and the Horn of Africa which share cultural inheritances with the Middle East and on the other is Africa south of the Sahara and the Sudan which despite interacting with the former is remarkably different in terms of technological practice. For example not only is the timing of metallurgy different but so is the infrastructure for working metals and the associated symbolic and sociological factors. The cultural valuation of metals and the social positions of metal workers were different too although there is evidence of some values transfer and multi-directional technological cross-borrowing. The multitude of permutations associated with metals production and use amply demonstrates that metals participated in the production and reproduction of society. Despite huge temporal and spatial differences there are so many common factors between African metallurgy and that of other regions of the world. For example the role of magic and ritual in metal working is almost universal be it in Bolivia, Nepal, Malawi, Timna, Togo or Zimbabwe. Similarly techniques of mining were constrained by the underlying geology but this should not in any way suggest that Africa's metallurgy was derivative or that the continent had no initiative. Rather it demonstrates that when confronted with similar challenges humanity in different regions of the world responded to identical challenges in predictable ways mediated as mediated by the prevailing cultural context. The success of the use of historical and ethnographic data in understanding variation and improvisation in African metallurgical practices flags the potential utility of these sources in Asia, Latin America and Europe. Some nuance is however needed because it is simply naïve to assume that everything depicted in the history or ethnography has a parallel in the past and vice versa. Rather the confluence of archaeology, history and ethnography becomes a pedestal for dialogue between different sources, subjects and ideas that is important for broadening our knowledge of global categories of metallurgical practice.

Proceedings of the 10th Focus Conference (TFC 2023) Manyane Makua, Mariam Akinlolu, Mashango Sithole, Phiwayinkosi Gumede, Cebo Nyondo, Ntombikhona Khuzwayo, Mandlenkosi Mhlongo, 2023-11-03. This is an open access book. The 2023 Focus Conference will focus on Goal Four Quality Education of the United Nations UN Sustainable Development Goals. SGD Goal Four is seized with providing equal access for all women and men to affordable and quality technical, vocational and tertiary education including university. Quality education in this context means the ability to function, provide and derive value in society. The theme of the conference is therefore coined as The Role of Higher Education in the Attainment of Sustainable Quality Education. Through this theme the conference will provide a space for participants to share practical knowledge, experiences and possible solutions to the myriad of problems that confront the higher education sector. Universities are often thought of as ivory towers far removed from the realities that confront global societies. To compound this higher education is increasingly being questioned for its relevance in providing practical and innovative solutions to existing societal problems. Such questions often navigate around the relevance of the academic programmes being offered, curriculum, the capacity of staff, employability of graduates and generally the ability of these

institutions to understand why they exist Indeed higher education s role in creating a sustainable future will presumably take on greater importance as the world continues to become increasingly globalised and interdependent **Routledge**

Palgrave Handbook of Ubuntu, Inequality and Sustainable Development Ezra Chitando,Beatrice Okyere-Manu,Sophia Chirongoma,Musa W. Dube,2025-02-28 The Palgrave Handbook of Ubuntu Inequality and Sustainable Development interrogates the multiple inequalities that subsist in the world and explores how Ubuntu emerging from Africa but being potentially applicable elsewhere holds promise for mitigation and resolution It highlights inequalities that relate to gender climate change the environment race migration and the struggle against poverty It reflects on how and the extent to which Ubuntu can be a strategic resource in pursuit of equality and justice *Families in Motion* Clara Gerhardt,2019-11-13

Dynamics of the family can be seen as a complex set of interrelated cogs like the dials and wheels within a sophisticated timepiece Families in Motion Dynamics in Diverse Contexts is a clear comprehensive and contextual view of how the dials and wheels of that complex set work together With a focus on multicultural competence through diverse contexts and examples this new text explores the complexities of the family regarding roles functions and development in a way that is approachable for students Grounded in theory and using 40 years of academic experience author Clara Gerhardt guides readers through concepts of family theories and examines the ever changing movement communication and conditions of both the family as a system and each member within the system Covering approaches from the theoretical to the therapeutic Families in Motion will support students in extending their cultural competence while understanding families and their members with greater confidence **The Emerging Policy for Green Economy and Social Development in Limpopo,**

South Africa Agnes Musyoki,2012 This paper evaluates the emerging green economy in South Africa using ideas from the concept of sustainable rural livelihoods which are intimately connected to ecological services many developing countries It finds that African communities and governments are prioritising green economy for job creation poverty alleviation and reducing inequalities while addressing global environmental concerns What remains problematic however is how these objectives are to be achieved The paper argues that one of the key challenges in South Africa is the gap between policy and

implementation of sustainable development the Millennium Development Goals and other globally driven initiatives The paper emphasises that green economy policy needs to consider poverty reduction and women s empowerment in order to promote rural sustainable development Publisher description *Rural Wage Employment in Developing Countries* Carlos Oya,Nicola Pontara,2015-05-22 There is a striking scarcity of work conducted on rural labour markets in the developing world particularly in Africa This book aims to fill this gap by bringing together a group of contributors who boast substantial field experience researching rural wage employment in various developing countries It provides critical perspectives on mainstream approaches to rural agrarian development and analysis of agrarian change and rural transformations from a long term perspective This book challenges the notion that rural areas in low and middle income countries are dominated by self employment It purports that this conventional view is largely due to the application of conceptual frameworks and statistical conventions that are ill equipped to capture labour market participation The contributions in this book offer a variety of methodological lessons for the study of rural labour markets focusing in particular on the use of mixed methods in micro level field research and more emphasis on capturing occupation multiplicity The emphasis on context history and specific configurations of power relations affecting rural labour market outcomes are key and reoccurring features of this book This analysis will help readers think about policy options to improve the quantity and quality of rural wage employment their impact on the poorest rural people and their political feasibility in each context **Ecology and Management of the**
