**Parallel Processing and Applied Mathematics** Roman Wyrzykowski, Jack Dongarra, Marcin Paprzycki, Jerzy Wasniewski, 2004-04-14 It is our pleasure to provide you with the volume containing the proceedings of the 5th International Conference on Parallel Processing and Applied Mathematics which was held in Czestochowa a Polish city famous for its Jasna Gora Monastery on September 7-10 2003 The first PPAM conference was held in 1994 and was organized by the Institute of Mathematics and Computer Science of the Czestochowa University of Technology in its hometown The main idea behind the event was to provide a forum for researchers involved in applied and computational mathematics and parallel computing to exchange ideas in a relaxed atmosphere Conference organizers hoped that this arrangement would result in cross pollination and lead to successful research collaborations In addition they hoped that the initially mostly Polish conference would grow into an international event The fact that these assumptions were correct was proven by the growth of the event While the first conference consisted of 41 presentations the conference reached 150 participants in Katowice in 2001 In this way the PPAM conference has become one of the premiere Polish conferences and definitely the most important one in the area of parallel distributed computing and applied mathematics This year's meeting gathered almost 200 participants from 32 countries A strict refereeing process resulted in the acceptance of approximately 150 contributed presentations while the rejection rate was approximately 33%

Jansen, 2019-11-05 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90-10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South

African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI Books in Print ,1982
