## **Journal Of Business Ethics Education:**

*Toward Assessing Business Ethics Education* Diane L. Swanson, Dann G. Fisher, 2010-11-01 *Toward Assessing Business Ethics Education* edited by Diane L Swanson and Dann G Fisher of Kansas State University is a sequel to their book *Advancing Business Ethics Education* in the Ethics in Practice IAP book series The focus on assessment in this second book is a timely response to the urgent search among business schools for ways to teach and assess ethics at a time when the public's faith in corporations and business schools has been undermined greatly by the failure of both to respond to widespread corruption and scandals in the business sector Although no one expects business education alone to resolve these problems the distinguished scholars represented in this book advocate that business schools should at least do their part by exposing their students to decision models that incorporate ethical dimensions on behalf of corporate stakeholders and society at large As the book's title conveys it is then important to assess key learning objectives to insure that business students graduate knowing ethics fundamentals and armed with the ability to recognize ethical dilemmas and possible solutions during the course of their careers This book will speak to all who are interested in accountability for business ethics education especially business school deans university administrators faculty members students and prospective employers This audience will find that the enterprise of assessing business ethics education is advanced in three ways First the book functions as a venue for distinguished scholars to share the innovative ways that they are assessing ethics coverage in courses and degree programs Second these authors identify what needs to be assessed and the means for doing so Third the book serves not only as a guide to assessment but also as a platform for expanding and improving ethics coverage in business schools Moreover an important take away for readers is the provision of a simple formula first advocated by Diane L Swanson and William C Frederick University of Pittsburgh in 2005 for delivering ethics education that minimizes assessment errors By following this formula business schools can provide assurances that ethics will not be assessed as being sufficient when it is woefully inadequate or even missing in the curriculum and that it cannot be distorted diluted or trivialized by uninformed coverage and still pass inspection Avoiding these assessment errors is critical in an educational environment in which weak accrediting standards for ethics go hand in hand with spotty uniformed coverage that would not be tolerated for other business disciplines

**Business Ethics Education and the Pragmatic Pursuit of the Good** Francis J. Schweigert, 2016-08-12 This book is an extended argument for the critical importance which justice and ethical leadership should have in business ethics education The book examines the history of ideas and purposes in education the contemporary role of business schools and the social foundations of moral education to conclude that the pragmatic pursuit of the good must be a central aim of business strategy To meet the challenges of facing society today the masters of business must be moral craftsmen in a just and democratic private property economy that serves the common good The author grounds this vision for business leadership in the centrality of systems of exchange in human society in generating prosperity and providing for the general welfare Business ethics education has focused primarily on moral formation of individual leaders and managers in the context of ethical codes organizational culture and legal compliance Important as this approach is it fails to generate a sufficient level of business responsibility to satisfy legitimate social concerns regarding the use of natural resources environmental sustainability reasonable limitation of systemic risk in capital markets and fair allocation of goods and services If the social purpose of business is not intentionally embraced and diligently pursued the economy may enrich a few but impoverish the society its resources and its democracy Hence this book argues for a new vision of business ethics that is grounded in public accountability of business operations and outcomes for the common good as a matter of justice
