The biologists were surprised to find that this particular wolf never strayed more than five miles away from the location in which it was first tagged.

Which one of the following, if true, would by itself most help to explain the behavior of the wolf tagged by the biologists?

- a. The area in which the wolves were released was rocky and mountainous, in contrast to the flat, heavily-wooded area from which they were taken.
- b. The wolf had been tagged and released by the biologists only three miles away from a sheep ranch that provided a large, stable population of prey animals.
- c. The White River Wilderness Area had supported a population of wolves in past years, but they had been hunted to extinction.
