Multiculturalism And Information And Communication Technology Madelyn R Sanfilippo:

Multiculturalism and Information and Communication Technology Pnina Fichman, Madelyn Sanfilippo, 2022-05-31

Research on multiculturalism and information and communication technology ICT has been important to understanding recent history planning for future large scale initiatives and understanding unrealized expectations for social and technological change This interdisciplinary area of research has examined interactions between ICT and culture at the group and society levels However there is debate within the literature as to the nature of the relationship between culture and technology In this synthesis we suggest that the tensions result from the competing ideologies that drive researchers allowing us to conceptualize the relationship between culture and ICT under three primary models each with its own assumptions 1 Social informatics 2 Social determinism and 3 Technological determinism Social informatics views the relationship to be one of sociotechnical interaction in which culture and ICTs affect each other mutually and iteratively rather than linearly the vast majority of the literature approach the relationships between ICT and culture under the assumptions of social informatics From a socially deterministic perspective ICTs are viewed as the dependent variable in the equation whereas from a technologically deterministic perspective ICTs are an independent variable The issues of multiculturalism and ICTs attracted much scholarly attention and have been explored under a myriad of contexts with substantial literature on global development social and political issues business and public administration as well as education and scholarly collaboration We synthesize here research in the areas of global development social and political issues and business collaboration Finally we conclude by proposing under explored areas for future research directions

indicators are not able to reflect the societal impacts of research and are slow to appear This has led to the creation of new indicators for different types of research impact as well as timelier indicators mainly derived from the Web These indicators have been called altmetrics webometrics or just web metrics This book describes and evaluates a range of web indicators for aspects of societal or scholarly impact discusses the theory and practice of using and evaluating web indicators for research assessment and outlines practical strategies for obtaining many web indicators In addition to describing impact indicators for traditional scholarly outputs such as journal articles and monographs it also covers indicators for videos datasets software and other non standard scholarly outputs The book describes strategies to analyse web indicators for individual publications as well as to compare the impacts of groups of publications The practical part of the book includes descriptions of how to use the free software Webometric Analyst to gather and analyse web data This book is written for information science undergraduate and Master s students that are learning about alternative indicators or scientometrics as well as Ph D students and other researchers and practitioners using indicators to help assess research impact or to study scholarly communication

Framing Privacy in Digital Collections with Ethical Decision Making Virginia Dressler,2022-06-01

As digital collections continue to grow the underlying technologies to serve up content also continue to expand and develop As such new challenges are presented which continue to test ethical ideologies in everyday environs of the practitioner There are currently no solid guidelines or overarching codes of ethics to address such issues The digitization of modern archival collections in particular presents interesting conundrums when factors of privacy are weighed and reviewed in both small and mass digitization initiatives Ethical decision making needs to be present at the onset of project planning in digital projects of all sizes and we also need to identify the role and responsibility of the practitioner to make more virtuous decisions on behalf of those with no voice or awareness of potential privacy breaches In this book notions of what constitutes private information are discussed as is the potential presence of such information in both analog and digital collections This book lays groundwork to introduce the topic of privacy within digital collections by providing some examples from documented real world scenarios and making recommendations for future research A discussion of the notion privacy as concept will be included as well as some historical perspective with perhaps one the most cited work on this topic for example Warren and Brandeis Right to Privacy 1890 Concepts from the The Right to Be Forgotten case in 2014 Google Spain SL Google Inc v Agencia Espa la de Protecci n de Datos Mario Costeja Gonz lez are discussed as to how some lessons may be drawn from the response in Europe and also how European data privacy laws have been applied The European ideologies are contrasted with the Right to Free Speech in the First Amendment in the U S highlighting the complexities in setting guidelines and practices revolving around privacy issues when applied to real life scenarios Two ethical theories are explored Consequentialism and Deontological Finally ethical decision making models will also be applied to our framework of digital collections Three case studies are presented to illustrate how privacy can be defined within digital collections in some real

world examples Mobile Search Behaviors Dan Wu,Shaobo H. Liang,2022-05-31 With the rapid development of mobile Internet and smart personal devices in recent years mobile search has gradually emerged as a key method with which users seek online information In addition cross device search also has been regarded recently as an important research topic As more mobile applications APPs integrate search functions a user s mobile search behavior on different APPs becomes more significant This book provides a systematic review of current mobile search analysis and studies user mobile search behavior from several perspectives including mobile search context APP usage and different devices Two different user experiments to collect user behavior data were conducted Then through the data from user mobile phone usage logs in natural settings we analyze the mobile search strategies employed and offer a context based mobile search task collection which then can be used to evaluate the mobile search engine In addition we combine mobile search with APP usage to give more in depth analysis such as APP transition in mobile search and follow up actions triggered by mobile search The study combining the mobile search with APP usage can contribute to the interaction design of APPs such as the search recommendation and APP recommendation Addressing the phenomenon of users owning more smart devices today than ever before we focus on user cross device search behavior We model the information preparation behavior and information resumption behavior in cross device search and evaluate the search performance in cross device search Research on mobile search behaviors across different devices can help to understand online user information behavior comprehensively and help users resume their search tasks on different devices *Images in Social Media* Susanne Ørnager,Haakon Lund,2022-06-01 This book focuses on the methodologies organization and communication of digital image collection research that utilizes social media content Image is here understood as a cultural conventional and commercial stock photo representation The lecture offers expert views that provide different interpretations of images and their potential implementations Linguistic and semiotic methodologies as well as eye tracking research are employed to both analyze images and comprehend how humans consider them including which salient features generally attract viewers attention This literature review covers image specifically photographic research since 2005 when major social media platforms emerged A citation analysis includes an overview of co citation maps that demonstrate the nexus of image research literature and the journals in which they appear Eye tracking tests whether scholarly templates focus on the proper features of an image such as people objects time etc and if a prescribed theme affects the eye movements of the observer The results may point to renewed requirements for building image search engines As it stands image management already requires new algorithms and a new understanding that involves text recognition and very large database processing The aim of this book is to present different image research areas and demonstrate the challenges image research faces The book s scope is by necessity far from comprehensive since the field of digital image research does not cover fake news image manipulation mobile photos etc these issues are very complex and need a publication of their own This book should primarily be useful for students in library and information

Governing Misinformation in Everyday Knowledge Commons Madelyn R. Sanfilippo, Melissa G. Ocepek, 2025-02-28 Governing Misinformation in Everyday Knowledge Commons delves into the complex issue of misinformation in our daily lives The book synthesizes three scholarly traditions everyday life misinformation and governing knowledge commons to present 10 case studies of online and offline communities tackling diverse dilemmas regarding truth and information quality The book highlights how communities manage issues of credibility trust and information quality continuously to mitigate the impact of misinformation when possible It also explores how social norms and intentional governance evolve to distinguish between problematic disinformation and little white lies Through a coproduction of governance and mis information the book raises a set of ethical economic political social and technological questions that require systematic study and careful deliberation This title is also available as Open Access on Cambridge Core

Governing Privacy in Knowledge Commons Brett M Frischmann, Madelyn R Sanfilippo, Katherine J Strandburg, 2021-05 Privacy in contrast with secrecy is a relational concept achieved when personal information is shared appropriately between actors Viewed in this way privacy is necessarily contextual and complex because norms about appropriate flows and use of personal information are socially negotiated and often contested Nissenbaum 2009 Privacy is thus a problem of collective action Moreover personal information is often among the knowledge resources pooled and managed by knowledge commons Even when that is not the case personal information can be important in shaping knowledge commons participation and governance The Governing Knowledge Commons GKC framework is thus well suited for studying and analyzing how communities or populations evaluate and shape governance of privacy in particular contexts Sanfilippo Frischmann Strandburg 2018

Technology in a Multicultural and Global Society May Thorseth, / Charles Ess, 2009-06-17 In this anthology we have gathered seven contributions from scholars undertaking research in the field of information technology Their main point of departure has been to investigate several aspects of this technology within a multicultural and global context The topics taken up here

cover a broad range of issues and they are discussed within the frames of different disciplines related to IT. The empirically based examples discussed in this volume are truly global in scope ranging from the USA, Denmark, Norway, the Netherlands, Saudi Arabia to China. We hope that students and scholars from a broad range of disciplines who read this anthology will find topics of interest and relevance to their own field. Another positive effect we hope for is that these articles both individually and collectively help bridge some of the gaps between different research fields, fields that may indeed profit from glimpsing into each other's perspectives. Last but not least, we also hope that this anthology will contribute to the rapidly growing field of applied ethics as related to information technology.
