*Unforgettable* W. Michael Gray, 2016-10-12 We have an uneasy relationship with the relentless deluge of information gushing out of academia and our media outlets To turn it off is escapist but to attempt to cognitively grapple with it is overwhelming In *Unforgettable* Enabling Deep and Durable Learning a nationally recognized master teacher gives professors and their students the means to chart a clear path through this information explosion Humans crave explanatory patterns and this book enables teachers to think deeply about their academic disciplines to find and articulate their core explanatory principles and to engage their students in a compelling way of thinking An alternative title for this book could be *Why the Best College Teachers Do What They Do* because the author articulates a compelling rationale that will equip faculty to create and deliver transformative courses Students in transformative courses grapple with essential questions and gain mental muscle that equips them for real world challenges

**Political Internet** Biju P. R., 2016-11-03 This book investigates the Internet as a site of political contestation in the Indian context It widens the scope of the public sphere to social media and explores its role in shaping the resistance and protest movements on the ground The volume also explores the role of the Internet a global technology in framing debates on the idea of the nation state especially India as well as diplomacy and international relations It also discusses the possibility of whether Internet can be used as a tool for social justice and change particularly by the underprivileged to go beyond caste class gender and other oppressive social structures A tract for our times this book will interest scholars and researchers of politics media studies popular culture sociology international relations as well as the general reader

[The Regulation of Megabanks](#) Katarzyna Parchimowicz, 2022-11-22 Global systemically important banks G SIBs are the largest most complex and in the event of their potential failure most threatening banking institutions in the world The Global Financial Crisis GFC was a turning point for G SIBs many of which contributed to the outbreak and severity of this downturn The unfolding of the GFC also revealed flaws and omissions in the legal framework applying to financial entities In the context of G SIBs it clearly

demonstrated that the legal regimes both in the USA and in the EU grossly ignored the specific character of these institutions and their systemic importance complexity and individualism As a result of this omission these megabanks were long treated like any other smaller banking institutions Since the GFC legal systems have changed a lot on both sides of the Atlantic and global and national lawmakers have adopted new rules applying specifically to G SIBs to reduce their threat to financial stability This book explores whether the G SIB specific regulatory frameworks are adequately tailored to their individualism in order to prevent them from exploiting overly general rules as they did during the GFC Analyzing the specific character and individualism of G SIBs in relation to their history normal functioning as well as their operations during the GFC this book discusses transformation of banking systems and the challenges and opportunities G SIBs face such as Big Tech competitors climate related requirements and the COVID 19 pandemic Taking a multidisciplinary approach which combines financial aspects of operations of G SIBs and legal analysis the book describes G SIB oriented legal frameworks of the EU and the USA and assesses whether G SIB individualism is adequately reflected analyzing trends in supervisory action when it comes to discretion in the G SIB context all in order to contribute to the ongoing discussions about international banking law its problems and potential remedies to such persistent flaws Energy in Orthodox Theology and Physics

Stoyan Tanev,2017-08-29 It is well known that energy is a fundamental concept in physics Much less well known is that it is also a key concept in Eastern Christian or Orthodox theology This book from Dr Stoyan Tanev a physicist innovation management scholar and theologian provides a comparative analysis of the conceptualizations of energy in Orthodox theology and in physics and demonstrates the potential of such comparison for a better understanding of these two quite different domains of human enquiry The book explores the rediscovery of the Byzantine Church s teaching on the Divine energies in twentieth century Orthodox theology and offers new insights about the key contributions of key theologians such as Sergius Bulgakov George Florovsky John Meyendorff Christos Yannaras and Thomas Torrance Where do the understandings of energy in theology and physics meet The author argues that the encounter between theology and physics happens at the level of quantum physics where the subtle use of words and language acquires a distinctive apophatic dimension His comparative approach focuses on the epistemological struggles of theologians and physicists According to Tanev this focus on the struggles of knowing offers a new way to look at the dialogue between science and theology
