Maths Plimpopo September 2014:

Condemned Again Skhumbuzo Letlaka, 2015-01-31 The work was conceived over a number of years and it relates to the manner in which African leaders govern their countries after independence Its main focus is on the South African politics under apartheid where racism and racial segregation was the order of the day and where white supremacy implied black inferiority It looks at a number of issues including humiliation and brutality that led to the United Nations declaring apartheid as crime against humanity It focuses on the processes leading to the build up of pressures that forced the racist government to accede to the demands of the international community and also bow to internal pressures which were exerted by the South African people themselves This book is written by a comrade who grew up in the township of Clermont a student of politics under the tutelage of Archie Gumede a man who rubbed shoulders with radicals such as Patrick Terror Lekota and Diliza Mji amongst others and a staunch Catholic whose wedding was conducted by Archbishop Denis Hurley Skhumbuzo Letlaka is a product of a township struggle stay aways consumer boycotts strikes school boycotts street committees and their tight discipline kangaroo courts and the application of the Mandela Plan **River Delta Futures**

Francisco-J. Hernández Adrián, Angelos Theocharis, 2025-02-20 How are climate change weather related disasters food and water insecurity and energetic and infrastructural collapse narrated audiovisually in the most environmentally vulnerable areas of the Planet This book addresses this and related questions by adopting a local and transdisciplinary perspective on river deltas from different areas of the world River deltas have historically been hotspots for human civilizations as populations settled in their fertile grounds seeking resources and opportunities for prosperity Despite this the terrains and livelihoods of those who rely on them are under threat from human exploitation environmental degradation and rapidly accelerating climate change Inspired by the UN Sustainable Development Goals this book provides a range of focused audiovisual analyses of deltaic spaces Ranging across a variety of media including documentary filmmaking animation photography collaborative comic making participatory visual art practices soundwalking and film analysis it examines the role that contemporary audiovisual media play in forging global environmental imaginaries In doing so it adopts a transdisciplinary approach to the Blue Humanities from countries across the world including Canada Bolivia Brazil Greece Nigeria Senegal India Bangladesh Myanmar Thailand and Vietnam *Code-Switching as a Pedagogical Tool in Bilingual Classrooms* Miriam Chitiga, 2021-11-29 Presenting a mixed methods study conducted in a bilingual mathematics classroom in Zimbabwe this text reveals the semantic pedagogical functions and linguistic forms of code switching during STEM instruction *Code Switching as a Pedagogical Tool in Bilingual Classrooms* offers a detailed analysis of code switching in the context of educational linguistics and reveals ten major pedagogical techniques which illustrate how teachers use code switches to engage students and provide guidance clarification discipline and recaps during individual and whole class interactions Chapters highlight that code switching can be used in a targeted manner to harness the cognitive potential of

Considerations of Indigenous Knowledge in Developing Countries Ngulube, Patrick, 2016-09-29 Knowledge systems are an essential aspect to the preservation of a community's culture In developing countries this community based knowledge has significant influence on such things as decision making and problem solving The Handbook of Research on Social Cultural and Educational Considerations of Indigenous Knowledge in Developing Countries is an authoritative reference source for the latest scholarly research on the importance of knowledge and value systems at the community level and ways indigenous people utilize this information Highlighting impacts on culture and education in developing nations this book is ideally designed for researchers academicians policy makers students and professionals interested in contemporary debates on indigenous knowledge systems **River Culture** UNESCO, UNESCO Office in Beijing, 2023-01-05 **Indigenous**

Technology Knowledge Systems Mishack T. Gumbo, P. John Williams, 2023-07-21 There has been a growing interest in indigenous knowledge systems and research This interest has been mainly triggered by the need to decolonize education as a response to the colonial onslaught on indigenous knowledge and people Research has however concentrated on the generality of the indigenous knowledge system rather than on its related dimensions One area that has suffered a lack of attention is indigenous conceptions of science technology engineering and mathematics STEM despite the unquestionable evidence of STEM in indigenous contexts Most STEM is presented by colonial establishments and representations especially in developed modern urban contexts which portray STEM as a colonial construct This book focuses on indigenous technological knowledge systems education ITKSE Indigenous people have been at the front of technological developments from pre colonial times The list of precolonial industries science and technology is extensive including blacksmithing wood carving textile weaving and dyeing leather works beadworks pottery making architecture agricultural breeding metal working salt production gold smithing copper smithing leather crafting soap making bronze casting canoe building brewing glass making and agriculture for example In some parts of the world such as Africa and Australia these technologies still exist ITKSE should not be left to exist outside of the technology education curriculum and classroom as it can benefit both indigenous students who have been denied learning about what is relevant to them and non indigenous students These cultural groups can expand their knowledge of technology by learning both ITKSE and Western technological knowledge systems education WTKSE ITKSE also presents opportunities for technology teachers to reflect on and revisit their depth of technological knowledge pedagogies and assessment The intent of this book is transformational in the sense that it brings

decolonial and indigenous perspectives into the technology education context It extends technology education in the sense that it will not only influence Western minded architects artisans designers etc but encourage indigenous mindedness as well
