Biotechnology Applications in Forestry Fred O Asiegbu, Andriy Kovalchuk, 2025-01-20 Biotechnology Applications in Forestry Forest Microbiology Volume Four in the Forest Microbiology series is a comprehensive exploration of harnessing the unique attributes of the microbes in the forest biome and their tree hosts The book introduces the basics of genomics applied bioinformatics and next generation sequencing providing a firm foundation before moving to specific approach application and use chapters Further sections explore opportunities through the use of genetics to expand or improve on many of these positive attributes of forest trees and associated organisms including adaptation to climate change as well as resilience to biotic and abiotic stressors Novel techniques and current advances in the application of modern biotechniques in tree health protection mushroom technology biological control biochar bioenergy Isolate strain selection metabolic engineering and commercial application relevant for forest ecosystem are also addressed Outlines novel approaches in the use of fungi or bacteria for biocontrol of insect pests and invasive plant species Highlights the many functions and uses of forest microbes as biofertilizers in soil fertility and in bioremediation including phytoremediation Addresses major industrial and biotechnological applications of forest microbes **Gaping Holes**, 2026-01-07 For much of the 20th Century industrial mining in southern Africa stood at the very forefront of modernity where it promised progress and economic development Yet in the present southern Africa is bedevilled by the toxic legacy of economic collapse societal upheaval and environmental ruin Industrial mining has transformed southern Africa at all levels from its flora and fauna to its water and air Globally it has become clear that mineral extraction once heralded as the epitome of progress is central to the Climate Crisis in the Anthropocene In this volume the contributors acknowledge this and attempt to contribute to histories and ethnographies of mining in southern Africa in which the human is decentred As such the various chapters focus on animals and plants in relation to mining and thus show a way forward for further research in southern Africa and beyond Contributors are Innocent Dande James R Fairhead Jan Bart Gewald Jan Jansen Sabine Luning Ettore Morelli Joseph Mujere Iva Pe a Jabulani Shaba Saskia Stehouwer Sandra Swart and Harry Wels **The Mining Journal, Railway and Commercial Gazette**, 1899

Re-Constructing the Global Network Economy Andrew Taylor, Adam Bronstone, 2022-10-07 This book looks at how to build more resilience into socio economic networks within local communities Understanding the relationships between attachment to place complex systems and patterns of knowledge creation is not straightforward but these relationships are emerging as the challenges that we face in bridging the gap between the social worlds that we inhabit and an emerging digital world These issues have been brought into even sharper focus through changes resulting from the COVID 19 pandemic On the one hand forced familiarity with communication technologies is driving globalisation forwards whilst on the other the crisis has created awareness of dependencies and heightened desires for more local solutions Plenty of books have been written about the rise of digital networks and the decline of local communities This book takes a radical approach by

identifying how these trends fit together and provides examples of how digital networks can be made to work for the local as well as the global economy Using a case study approach the book offers a clear sighted view of the role of relational capital in specific places and organisations and shows the transformational impact that they can have at a micro level The book deliberately seeks to shake up preconceived ideas and is ideal for strategy practitioners and policy makers within governments and NGOs involved in connecting local to wider network economies
