

101F542 Telapex Telephone Interface Card

Dukane Model 101F542 Telapex Telephone Interface Card, when added to an MCS350 system, adds an interface to a standard DTMF telephone or a PBX loop start trunk port to create an MCS350T system. The package contains a telephone interface card along with associated cables and mounting hardware.

An RS-485 port on the telephone interface card allows a Dukane model RDU350 to be connected to display speaker station call-in status as well as system information such as time of day.

The 101F542 is recommended for current non-Telapex card MCS350 systems that require integration with a facility's PBX or where a remote display of incoming call-ins is desired.

The 101F542 takes up one ACC port in a system, reducing the capacity of ACCs from 4 to 3, and in rack configurations reduces the capacity of switching cards by one, from 16 to 15, or 256 to 240 remote speaker stations.

Standard Features

- Provides a means of integrating an MCS350 system to a telephone or telephone system
- Supports either DTMF telephones or PBX loop start trunk ports
- Provides a port for the remote display of call-in and system information

Engineers' Specification

1. The Telapex Telephone Interface Card shall be the Dukane 101F542, or an approved equal.
2. It shall be modular in design, and install into any MCS350 system to convert it to an MCS350T system.
3. It shall provide a single subscriber line port for connection to either a DTMF telephone or a PBX loop start trunk port.
4. It shall provide a single RS-485 communications port for connection to a Dukane model RDU350 Remote Display Unit for the purpose of displaying call-in and system information.
5. It shall cause the RDU350 to display system time when no system activity is present.
6. It shall employ all solid-state circuitry and shall be assembled on a printed circuit board constructed of G-10 glass epoxy material.
7. The circuit board shall be a card-cage plug-in type with field terminations by means of screw terminal strips.
