

General

The IMC BACnet® Module (BP1) allows communication between the Lennox IMC M1-8 controller and a BACnet® MS/TP network. This module is mounted directly to the M1-8 Integrated Modular Controller and is not compatible with M1-7 IMC and earlier versions. Replacement for earlier remote mounted IMC BACnet® modules requires replacing existing parts with the M1-8 IMC and the new IMC BACnet Module.

The IMC BACnet® Module has been developed to communicate with building automation systems that support the BACnet Application Specific Controller (B-ASC) device profile.

A Lennox zone sensor, a BACnet® network zone sensor, or a BACnet® thermostat may be used to send the zone temperature or thermostat demands to the IMC.
