Advances in Applied Mathematics Ali R. Ansari, 2014-08-04 This volume contains contributions from the Gulf International Conference in Applied Mathematics held at the Gulf University for Science Technology The proceedings reflects the three major themes of the conference The first of these was mathematical biology including a keynote address by Professor Philip Maini The second theme was computational science numerical analysis including a keynote address by Professor Grigori Shishkin The conference also addressed more general applications topics with papers in business applications fluid mechanics optimization scheduling problems and engineering applications as well as a keynote by Professor Ali Nayfeh The Rise of the Cyberzines: The Story of the Science-Fiction Magazines from 1991 to 2020 Mike Ashley, 2022-02-15 Shortlisted for the Locus Science Fiction Foundation Non Fiction Award 2023 The Rise of the Cyberzines concludes Mike Ashley's five volume series which has tracked the evolution of the science fiction magazine from its earliest days in the 1920s to its current explosion via the internet This series has traced the ways in which the science fiction magazine has reacted to the times and often led the way in breaking down barriers for example in encouraging a greater contribution by women writers and stimulating science fiction globally Magazines have continued to build upon past revolutions such as the new wave and cyberpunk producing a blend of high tech science fiction and expansive speculative fiction that has broadened the understanding of science and its impact on society This final volume which covers the years 1991 2020 shows how the online magazine has superseded the print magazine and has continued to break down barriers especially for the LGBTQ community and for writers of colour **Brave New E-world (In 2 Volumes)** Michael Gurvitch, 2022-09-27 In this two volume work writing for a general audience Dr Michael Gurvitch proposes a unifying concept of electronics which combines the history of electronics with the science of evolution Drawing on his long experience in scientific development Gurvitch illuminates electronics from the inside using the point of view of a practicing scientist What is elusive and often overlooked becomes palpable engaging and even humorous with the author's tireless and methodical exposition of fundamental scientific roots from which electronics grew and continues to grow This set contains both volumes of Brave New e World presenting the historical review of electronics from the middle of the 18th century to the present day From the telegraph to the quantum computer and superconductors Gurvitch combines personal recollections with scientific knowledge to advance the final thesis the representation of a new non biological evolution in electronics This is all done in an intellectually engaging way spiced by historical anecdotes warmed by Gurvitch's enthusiastic love for science and completed with the full participation of the reader The concluding argument on electronic evolution is alarming but it might prove to be a necessary concern in the continual development of electronic technologies *Measuring Teachers' Beliefs Quantitatively* Safrudiannur, 2020-04-06 The use of Likert scale instruments for measuring teachers beliefs is criticized because of amplifying social desirability reducing the willingness to make differentiations and often providing less or no contexts Those

weaknesses may distort teachers responses to a Likert scale instrument causing inconsistencies between their responses and their actions Therefore the author offers an alternative approach by employing rank then rate items and considering students abilities as one of the factors affecting teachers beliefs The results confirm that the offered approach may give a better prediction about teachers beliefs than does a Likert scale instrument

Interrogating Whiteness and

Relinquishing Power Nicole M. Joseph, Chayla Haynes, Floyd Cobb, 2016 Interrogating Whiteness and Relinquishing Power White Faculty s Commitment to Racial Consciousness in STEM Classrooms is a collection of narratives that will transform the

teaching of any faculty member who teaches in the STEM system The book links issues of inclusion to teacher excellence at all grade levels by illuminating the critical influence that racial consciousness has on the behaviors of White faculty in the classroom It functions as an analytical tool scaffolding exemplary examples to inspire readers to engage in the complex and difficult work of assessing their own racial consciousness and teacher effectiveness White pre service teachers in STEM education rarely see the importance of the link between race and the teaching and learning of mathematics in part because the White faculty who are teaching these subjects rarely engage in the study of racial projects in STEM From this perspective the authors of this book contend that the classroom is a racialized environment that if not addressed can reproduce racial structures and hierarchies in cyclical ways
