Leningrad Mathematical Olympiads (1961-1991) Dmitri V Fomin, 2025-01-24 This book covers thirty years of the Leningrad Mathematical Olympiad which was ostensibly the very first formally organized open official city level mathematical contest in the world Founded in 1934 by a group of dedicated Soviet mathematicians it played an outstanding and often underappreciated role in creating the Leningrad St Petersburg school of mathematics of the 20th century The book begins with the extensive introduction containing two prefaces one of them written specifically for this edition a large historical survey of the Leningrad Mathematical Olympiad a section describing the logistical side of the contest and a small chapter dedicated to the very first Mathematical Olympiad held in 1934 whose problems were recently found in the Soviet era library archives The main text contains approximately 1 100 highly original questions for students of grades 5 through 10 ages 11 12 through 17 18 offered at the two concluding rounds of the Leningrad City Mathematics Olympiads in the years of 1961 1991 Full solutions hints and answers are provided for all questions with very rare exceptions It also includes 120 additional questions offered at the various mathematical contests held in Leningrad over the same thirty year period on average their difficulty is somewhat higher than that of the regular Mathematical Olympiad problems

How to Enhance Learning Efficiency When Online Learning is Popular and Indispensable: Theory, Research and Practice Rong Lian, Chang Liu , Juzhe Xi, 2024-07-17

Online learning has become more and more common globally whether for comfort adapting to work hours or just having the

freedom to study from anywhere And now under the coronavirus pandemic as people are having to stay at home it has become more important than ever Although the popularity of wireless network and portable smart device makes it possible for people to acquire and learn knowledge anytime and anywhere it does not necessarily mean an increased learning performance Relevant research in cognitive science has revealed possible limitations in online learning For example the knowledge acquired through online learning tends to be fragmented and lacks guidance for integrated thinking among different subjects which makes it difficult for learners to form a systematic knowledge structure Learners may experience cognitive overload metacognitive illusion and low learning efficiency in self regulated learning It follows that in the post COVID 19 era online learning puts forward new requirements and challenges to the contemporary students not only to their learning strategies but positive character traits in learning Most of the current learning theories were developed in the early 20th century and may not fit in well with the current situation then possibly leading to inefficient learning and increased learning burden Therefore it is necessary and important to reexplore the influencing factors and mechanisms that affect the learning efficiency of students at all levels nowadays based on which we could construct a theoretical model of efficient learning model
