 Matthew H. Edney, Mary Sponberg Pedley, 2020-05-15 Since its launch in 1987 the History of Cartography series has
 garnered critical acclaim and sparked a new generation of interdisciplinary scholarship Cartography in the European
 Enlightenment the highly anticipated fourth volume offers a comprehensive overview of the cartographic practices of
 Europeans Russians and the Ottomans both at home and in overseas territories from 1650 to 1800 The social and intellectual
 changes that swept Enlightenment Europe also transformed many of its mapmaking practices A new emphasis on geometric
 principles gave rise to improved tools for measuring and mapping the world even as large scale cartographic projects
 became possible under the aegis of powerful states Yet older mapping practices persisted Enlightenment cartography
 encompassed a wide variety of processes for making circulating and using maps of different types The volume s more than
 four hundred encyclopedic articles explore the era s mapping covering topics both detailed such as geodetic surveying
 thematic mapping and map collecting and broad such as women and cartography cartography and the economy and the art
 and design of maps Copious bibliographical references and nearly one thousand full color illustrations complement the
