**Effectiveness of teachers' guides in the Global South** Benjamin Piper,Yasmin Sitabkhan,Jessica Mejia,Kellie Betts,2018-05-10 This report presents the results of RTI International Education s study on teachers guides across 13 countries and 19 projects Using quantitative and qualitative methods we examine how teachers guides across the projects differ and find substantial variation in the design and structure of the documents We develop a scripting index so that the scripting levels of the guides can be compared across projects The impact results of the programs that use teachers guides show significant impacts on learning outcomes associated with approximately an additional half year of learning showing that structured teachers guides contribute to improved learning outcomes During observations we find that teachers make a variety of changes in their classroom instruction from how the guides are written showing that the utilization of structured teachers guides do not create robotic teachers unable to use their own professional skills to teach children Unfortunately many changes that teachers make reduce the amount of group work and interactivity that was described in the guides suggesting that programs should encourage teachers to more heavily utilize the instructional routines designed in the guide The report includes a set of research based guidelines that material developers can use to develop teachers guides that will support effective instructional practices and help improve learning outcomes The key takeaway from the report is that structured teachers guides improve learning outcomes but that overly scripted teachers guides are somewhat less effective than simplified teachers guides that give specific guidance to the teacher but are not written word for word for each lesson in the guide

**Achieving Education for All** Ishmael I. Munene,2016-06-16 Using the Education for All EFA global movement as the setting this book surveys the complex labyrinths of international education policy making the design and implementation of system wide educational reform and the assessment of learning outcomes in the African context It addresses the following questions what does it mean for African states to reform their educational systems to meet the global agenda of Education for All and the Millennium Development Goals Under what structural conditions have African governments implemented universal primary education programs and with what outcomes What are the lessons learned and how do these inform the

post 2015 agenda for universal primary education in Africa and other developing countries This book provides answers to these questions and opens the possibilities for new approaches to Education for All in the context of constrained resources unstable political climates and the agency of local communities It is undeniable that African governments responded to the educational goals espoused in EFA and MDG paradigms through their own education for all plans and expended vast resources to realize these objectives However there remains a serious gap in knowledge about the design of these plans the influence of local and international forces in their development the challenges inherent in executing comprehensive and multifaceted reforms to achieve these goals and the success of the reform measures as evident in student learning outcomes This book addresses this knowledge gap in three ways First it utilizes empirical data collected over a five year period from six African countries Kenya Mali Senegal Nigeria Tanzania and Uganda to illuminate how the global agenda on education has been debated designed and implemented across the continent and with what outcomes Second it frames the six nation case studies within the wider logic of international educational policy agenda and the continent wide search for education quality Finally the analysis of universal primary education strategies is undertaken from an interdisciplinary perspective thereby allowing a more comprehensive view of the educational reform Black Intellectual Thought in Education Carl A.

Grant, Keffrelyn D. Brown, Anthony L. Brown, 2015-09-25 Black Intellectual Thought in Education celebrates the exceptional academic contributions of African American education scholars Anna Julia Cooper Carter G Woodson and Alain Leroy Locke to the causes of social science education and democracy in America By focusing on the lives and projects of these three figures specifically it offers a powerful counter narrative to the dominant established discourse in education and critical social theory helping to better serve the population that critical theory seeks to advocate Rather than attempting to rescue a few African American scholars from obscurity or marginalization this powerful volume instead highlights ideas that must be probed and critically examined in order to deal with prevailing contemporary educational issues Cooper Woodson and Locke s history of engagement with race democracy education gender and life is a dynamic demanding and authentic narrative for those engaged with these important issues **Education in Tanzania in the Era of Globalisation** Lugalla, Joe

L.P., Ngwaru, Jacob Marriote, 2019-03-31 Education in Tanzania in the Era of Globalisation Challenges and Opportunities is a product of papers presented at a National Education Conference held in Dodoma Tanzania in November 2016 and organised by the Aga Khan University Institute for Educational Development East Africa AKU IED EA At present Tanzania s development direction is guided by Vision 2025 which aims to achieve a high quality livelihood for its people be attainment of Vision 2025 will depend largely on rapid socio economic development based on several social and economic pillars including most importantly education Clearly for Tanzania the scope and quality of education remains the single most important prerequisite to the attainment of Vision 2025 and the 17 Sustainable Development Goals SDGs The individual chapters in this publication and their collective thrust discuss the challenges in the education system in good faith and in the spirit of

cooperation and collaboration guided by the belief that it is not the responsibility of the Government alone to see how these can be addressed AKU IED EA has identified this as the responsibility of all well meaning corporate bodies and citizens and initiated this conference of its type as its contribution to this conference as well as the publication has to be seen as a model of good practice for universities in terms of sharing knowledge experience and practice with other stakeholders who are not in the academy and more so with politicians as well as government policy planners The various authors of Education in Tanzania in the Era of Globalisation Challenges and Opportunities discuss issues within the context of the Tanzanian political economy against the effects of globalization and seek to initiate a new kind of debate that is long overdue a debate aimed at charting out appropriate strategies whose objective is to improve the quality of education in Tanzania so that it becomes a useful vehicle in enhancing processes of social change transformation and development
